65+. The Best Years of Your Life Peter Bowden, 2019-02-15 What is the key to happiness in later life Since the time of the ancient philosophers such as Plato and Aristotle the human race has questioned and written about what makes us happy But with the rise of life expectancy and rapidly ageing populations happiness in later life has become a major topic of debate Drawing on three sources the lessons of history a survey of 150 people aged over 65 and the findings of the present day positive psychologists this book analyses and considers what it means to be in happy in later life and how it can be achieved Bowden reflects on our many and differing views of life after retirement and finds lessons that can also contribute to our happiness in earlier years Importantly this book also asks and answers what role governments and our social institutions play in bringing about happiness This valuable and well informed insight into happiness in later life leaves the reader with little doubt that the post 65 years can indeed be your best **The Oxford**

Group and the Emergence of Animal Rights Robert Garner, Yewande Okuleye, 2020-10-20 Animal rights is now a concept that has achieved wide name recognition Vegetarianism and even veganism is now commonplace representing a massive transformation in public attitudes Fifty years ago the concept of animal rights was almost unheard of and the animal protection movement lay dormant Even vegetarians were regarded as at best cranks and at worst dangerous critics of the social order Yet the late 1960s and early 1970s were a formative time for the contemporary animal rights movement One of the most important and influential intellectual moments for animal rights occurred at this time at Oxford University among like minded scholars who would become known as the Oxford Group The Oxford Group and the Emergence of Animal Rights is about this little known group a loose friendship group of primarily postgraduate philosophy students who attended the University of Oxford for a short period of time in the late 1960s The book traces the early development of the Oxford Group and its influence on animal rights theory and activism It also serves as a case study of how the emergence of important work and the development of new ideas can be explained as well as how the intellectual development of participants in a

friendship group is influenced by their participation in a creative community For example would Peter Singer have written his landmark book *Animal Liberation* or anything about animal ethics without being exposed to the other members of the Oxford Group How would the discipline of animal ethics differ if the group had not produced their edited collection of articles *Animals Men and Morals* Drawing on previously unpublished correspondence among and interviews with the surviving Oxford Group members Robert Garner and Yewande Okuleye explore the social and political milieu in which the group formed to understand how such intellectual movements coalesce
