On Call A Doctors Days And Nights In Residency:

On Call Emily R. Transue, 2004-08 A memoir of the birth of a doctor from internship to residency **Doctors' Marriages** Michael Myers, 2013-04-17 In marriage partners bring together preexisting psychological and cultural histories which may be quite disparate The idea that love conquers all does not account for the complexities involved in the development of a contemporary partnership Societal changes over the past few decades have resulted in important shifts in patterns of relationships Lengthened life spans decreased incidence and severity of illness and disability and the availability of contraception have affected our lives and plans substantially Among the effects are marriages that last longer than they ever have and produce fewer children despite the high divorce rate Values and expectations in marriage have also changed over the past several decades shifting from an emphasis on survival and economic security to a focus on companionship love and communication The desire for self fulfillment has superseded more traditional concerns about family loyalty and responsibility Thus divorce is often sought as a solution to frustration disappointment and conflict A societal change that has had considerable influence on individuals and their relationships has been the emergence of the women's movement and changing roles and expectations for women This change has brought new demands fulfillments and conflicts Current styles of marriage have shifted from an automatic acceptance of clearly designated gender determined roles toward more egalitarian and interdependent relationships with partners also expressing their own goals styles and personalities The dual career or dual worker family has emerged as the dominant family structure in the United States **This Did Not Surprise Me** Karolyn Cook MD, 2025-01-27 Grieving the loss of a beloved child God is clearly with us as the countless examples in *This Did Not Surprise Me* illustrate The Corban Clinic is proof positive God can turn a tragic trauma into a kingdom building treasure Grieving is natural Karolyn and Ted's story will bring you through healing tears to renewed hope grieving resources struggles of building a clinic and family dynamic issues to consider Personally I felt the need to re read sections of their gut wrenching story as soon as I finished First time through I was moved to empathic tears multiple times The researched resource list is priceless God's clear hand in all things Corban complete with relevant Bible references created a higher purpose to my reading Most importantly the dramatic effect of Corban's death on his siblings opened up conversations with my own sons surrounding the stillborn deaths of their four sisters Karolyn's insightful words woke my wife and me to the reality that we were naive to selfishly think that we were the only ones devastated May you feel God's presence as you flip the pages of this Holy Spirit inspired book Marc Newquist MD FACEP ER physician President and Chief Medical Officer of In House Medical and Medical Ambassadors *Fifty Years a Doctor* Ronald Halweil, MD, 2022-07-20 *Fifty Years a Doctor* The Journey of Sickness and Health Four Plagues and the Pandemic Ronald Halweil MD Every new medical advance seems to be paired with a loss of older wisdom but this rush to eliminate the old in favor of the new causes needless suffering and premature death Over his fifty plus year career as a medical and surgical practitioner Dr Ronald Halweil has seen these

changes firsthand In this book Dr Halweil recounts his experiences as a student his insights as a practitioner and his personal search for the nature of health and disease

The Color of Atmosphere Maggie Kozel, 2011 If the medical profession you d devoted your life to was completely taken over by liability concerns and insurance regulations would you stay a physician The Color of Atmosphere tells one doctor s story and the route of her medical career with warmth humor and above all honesty As we follow Maggie Kozel from her idealistic days as a devoted young pediatrician through her Navy experience with universal health coverage and on into the world of private practice we see not only her reverence for medical science and her compassion for her patients but also the widening gap between what she was trained to do and what is eventually expected of her Her personal story plays out against the backdrop of our changing health care system and demonstrates the way our method of paying for health care has reached its way into the exam room putting a stranglehold on how doctors practice and profoundly influencing the doctor patient relationship The stories she shares illustrate the medical economic and moral complexities of US health care To understand Dr Kozel s ultimate decision to leave medicine is to better comprehend the disconnect between our considerable medical resources and how our health care system falls short of delivering them

Life And Death And The Things In Between Pierre Richard Arty M.D., 2017-10-23 Just where is the intersection between spirituality and medicine Life and Death and the Things in Between is a collection of ten stories documenting the struggles and strengths of the human spirit as it searches for meaning amid challenging circumstances The stories reveal the psychological and emotional experiences of people in Dr Arty s milieu who are besieged by profound life changing events and circumstances such as severe mental illness addiction terminal illness and personal loss They are stories of love and courage and of trauma and suffering Most of all they are stories of compassion and hope Being a psychiatrist of Haitian origin working in Brooklyn New York Dr Arty has incorporated his heritage and culture into several of the stories some of which are written within the frame of a medical illness The publication of this book is a new proof of Dr Arty s determination to share his rich experience with other human beings There is no doubt that the readers will see this book as an invitation to remain compassionate and courageous in the worst times of adversity

E F Th baud M D Clinical Assistant Professor of Psychiatry SUNY Downstate Medical Center In his series of short stories adapted from his personal experiences or that of his patients Pierre vividly weaves an intricate web of each character s story His depiction of each story is more enthralling than the other Mary Pender Greene LCSW R Psychotherapist Author President and CEO of MPG Consulting These are stories of the mentally ill and the disenfranchised of immigrants and the down and out stories of life and death faith hope and love They are stories that touch our hearts with their humanity and their reflection of the human condition

Soul of the Healer ,2005 **The Medical Carnavalesque** Lisa Gabbert,2024-08-06 The practice of medicine is immersed in issues of life death and suffering in relation to the mortal body Because of this the medical profession is a fertile arena for folklore that serves to address these topics among physicians In *The Medical Carnavalesque* Lisa Gabbert argues that this extraordinarily difficult work context has led to the development of an occupational corpus of folklore backstage talk and humor that she calls the medical carnivalesque Gabbert argues that suffering is not only something experienced by patients but that the organization practice and ethos of medicine can induce suffering in physicians themselves Featuring topics such as the institutionalized nature of physician suffering death related humor and talk stories about patient bodies and parodies of medical specialties *The Medical Carnavalesque* shows us how the culture of contemporary medicine uses travesty humor and inversion to address the sometimes painful and often transgressive aspects of doctoring *The Medical Carnavalesque* connects patient and physician suffering to laughter acknowledges suffering as an essential component of life and constitutes a way in which some physicians address the core philosophical and existential issues with which they regularly engage as they go about their daily work

Beneath the Surface Harry Barry,2025-09-18 Beautiful and compelling a manual for life Ryan Tubridy This book provides unique insights into the life and work of one of Ireland s most influential doctors SR STAN KENNEDY More than the story of one man s life it is an invitation to pause reflect and find deeper meaning in our own DR SABINA BRENNAN DR HARRY BARRY s life and career has been shaped by defining events a solitary childhood with chronic illness a traumatic experience in school and family tragedies that set him on a course of dedicating his life to medicine and healing *Beneath the Surface* tells that remarkable story From the halls of University College Dublin in the 1970s to a remote hospital in Tanzania where he would meet someone who was to have a transformative effect on his approach to health and on through decades on the front line of Irish general practice culminating in a life altering realisation that would see him change the course of his career This thought provoking and inspiring memoir shows us how by embracing compassion and love we can transform not only our own lives but the world around us

Women in Medical Education Delese Wear,1996-10-03 *Women in Medical Education* combines personal narratives written by sixteen women medical educators who as clinicians basic scientists administrators and medical humanities faculty write of their experiences with students patients colleagues and administrators Their narratives reflect the issues confronting women in the medical academy today including working in situations where power relations are embedded and enacted daily in the ethos of the institution where rigid disciplinary boundaries do not include or invite inquiry into gender race ethnicity or class where integrating one s personal and work life often seems overwhelming Yet their stories reflect the success and recognition that women in academic medicine have achieved The book includes essays written by Beth Alexander Janet

Several Worlds: Reminiscences And Reflections Of A Chinese-american Physician Monto Ho, 2005-10-25 This fascinating book comprises the autobiographical reminiscences and reflections of Monto Ho M D a Chinese born American physician and widely recognized infectious disease specialist It presents a remarkable opportunity to understand his personal history the development of his scholarly qualities and the logic of his scientific and cultural passions A leader in the field over the past half a century the author was a pioneer investigator of interferon He made major contributions to the pathogenesis of virus infections in the immunocompromised host especially of cytomegalovirus and other herpesvirus infections in organ transplant recipients He built a strong science based infectious diseases group at the University of Pittsburgh in the US In his second career in Taiwan Monto Ho changed the direction of his research to address problems that were important to that country He recognized the threat posed by the emergence of antibiotic resistant bacteria and the need to enhance the quality

of training of infectious diseases physicians These efforts paid unexpected dividends The appropriate use of antibiotics has become an important national health priority and there is now intense research on the devastating outbreaks of enterovirus 71 in children *Catching Babies* Ita Gold M.D.,2025-01-12 Dr Gold didn't want to be a doctor but had her options limited by her family She trained in medicine before there was awareness of sexual harassment and when teaching medicine by shaming was the norm As hard as that was by itself she carried the responsibility of having children in medical school and single parenting through residency as well as taking care of her family members while in training Through all of this she held on to her humanity and connection to her patients She became part of the fabric of their experience and they became part of the fabric of her life She used her intuition and hands to treat and heal women and in return they taught her the lessons in life she needed to grow This is a compilation of her stories and the culmination of wisdom she acquired from caring for women *Technology and the Doctor-Patient Relationship* D.C. Lozar, M.D.,2019-08-16 Medicine is an ancient profession that advances as each generation of practitioners passes it down It remains a distinguished flawed and rewarding vocation but it may be coming to an end as we know it Computer algorithms promise patients better access safer therapies and more predictable outcomes Technology reduces costs helps design more effective and personalized treatments and diminishes fraud and waste Balanced against these developments is the risk that medical professionals will forget that their primary responsibility is to their patients not to a template of care Written for anyone who has considered a career in health care and for any patient who has had an office visit where a provider spent more time with data entry than with them this book weighs the benefits of emerging technologies against the limitations of traditional systems to envision a future where both doctors and patients are better informed consumers of health care tools *Fragmented: A Doctor's Quest to Piece Together American Health Care* Ilana Yurkiewicz MD,2023-07-11 An award winning physician writer exposes how pervasive cracks in the health care system cost us time energy and lives and how we can fix them There's an unspoken assumption when we go to see a doctor the doctor knows our medical story and is making decisions based on that story But reality frequently falls short Medical records vanish when we switch doctors Critical details of life saving treatment plans get lost in muddled electronic charts The doctors we see change according to specialty hospital shifts or an insurer's whims Physician Ilana Yurkiewicz calls this phenomenon fragmentation and she argues it's the central failure of health care today In this gripping narrative from medicine's front lines Yurkiewicz reveals how a system that doesn't talk to itself puts insupportable burdens on physicians patients and caregivers forcing them to heroic lengths to hold the pieces together barely The stories she tells are at once harrowing and commonplace A patient narrowly averts an unnecessary invasive heart procedure by producing a worn rhythm strip he has carried in his pocket for a decade A man diagnosed with leukemia while visiting from abroad has thirty-one physicians but no one he can call his doctor with tragic consequences When Yurkiewicz's own father falls ill a culture that incentivizes health care providers to react with quick fixes to the problems immediately before them often to the

neglect of a patient's overall narrative leads to weeks of additional suffering and a risky hospital transfer. The system is hanging by a thread and we need better solutions. Yurkiewicz issues a clear-eyed call for change, naming concrete reforms doctors and policymakers can make and empowering patients and their loved ones to advocate for themselves in the meantime. Urgent, radiantly humane and ultimately hopeful, *Fragmented* is a prescription for what really needs fixing in modern medicine.
