On Looking A Walkers Guide To The Art Of Observation:

On Looking Alexandra Horowitz, 2013 *On Looking* begins with inattention It is about attending to the joys of the unattended the perceived ordinary Horowitz encourages us to rediscover the extraordinary things that we are missing in our ordinary activities Even when engaged in the simplest of activities like taking a walk around the block we pay so little attention to most of what is right before us that we are sleepwalkers in our own lives **On Looking** Alexandra Horowitz, 2013-01-08 From the author of the 1 New York Times bestseller *Inside of a Dog* this elegant and entertaining *The Boston Globe* explanation of how humans perceive their environments does more than open our eyes opens our hearts and minds too gently awakening us to a world in fact many worlds we've been missing *USA TODAY* Alexandra Horowitz shows us how to see the spectacle of the ordinary to practice as Sir Arthur Conan Doyle put it the observation of trifles Structured around a series of eleven walks the author takes mostly in her Manhattan neighborhood *On Looking* features experts on a diverse range of subjects including an urban sociologist the well known artist Maira Kalman a geologist a physician and a sound designer Horowitz also walks with a child and a dog to see the world as they perceive it What they see how they see it and why most of us do not see the same things reveal the startling power of human attention and the cognitive aspects of what it means to be an expert observer Page by page Horowitz shows how much more there is to see if only we would really look Trained as a cognitive scientist she discovers a feast of fascinating detail all explained with her generous humor and self deprecating tone So turn off the phone and other electronic devices and be in the real world where strangers communicate by geometry as they walk toward one another where sounds reveal shadows where posture can display humility and the underside of a leaf unveils a Lilliputian universe where indeed there are worlds within worlds within worlds
