Kramer,2024-07-02 Religion Today introduces students to key concepts in religious studies through a compelling problem solving framework Each chapter opens with a contemporary case study that helps students engage in current religious issues explore possible solutions to difficult religious problems today and learn key themes and concepts in religious studies To enhance student learning a free Student Study Guide is available for download from Rowman Littlefield The Study Guide features chapter summaries definition quizzes for students to test themselves on key terms and possible learning activities *The Cambridge Handbook of Consciousness* Philip David Zelazo,Morris Moscovitch,Evan Thompson,2007-05-14 The Cambridge Handbook of Consciousness is the first of its kind in the field and its appearance marks a unique time in the history of intellectual inquiry on the topic After decades during which consciousness was considered beyond the scope of legitimate scientific investigation consciousness re emerged as a popular focus of research towards the end of the last century and it has remained so for nearly 20 years There are now so many different lines of investigation on consciousness that the time has come when the field may finally benefit from a book that pulls them together and by juxtaposing them provides a comprehensive survey of this exciting field An authoritative desk reference which will also be suitable as an advanced textbook The Inner Journey Home A. H. Almaas,2004-04-27 What is the soul and how do we come to know it What is its journey in life and what stages and obstacles are encountered along the way These questions are explored here in detail according to the Diamond Approach a spiritual path that combines systematic inquiry into personal experience the practice of traditional spiritual methods and the application of modern psychological research The Inner Journey Home is the centerpiece of the Diamond Approach literature providing a complete overview of the teaching with references to the author s other books for more details on certain topics **The Human Being in Contemporary Philosophical Conceptions** Nikolai Omelchenko,2009-03-26 This book is a collection of the selected proceedings of the 4th International Conference Human Being in Contemporary Philosophical Conceptions which was held under the patronage of UNESCO at Volgograd State University Russia on May 28 31 2007 In the letter to the organizers Mr Ko chiro Matsuura wrote I should like to congratulate you on this important initiative to promote philosophical reflection which is one of the central objectives of UNESCO s Intersectoral Strategy on Philosophy There is an interesting fact the 19th World Congress of Philosophy in Moscow 1993 had no session on philosophical anthropology the next Congress in Boston 1998 had one such session the 21st Congress of Philosophy in Istanbul 2003 had already four sessions and the 22nd World Congress of Philosophy in Seoul 2008 had six sessions on

philosophical anthropology Obviously we may observe a new anthropological renaissance in contemporary thought This book serves the philosophical anthropology becoming as well Perhaps an idea of integral studies is the most attractive trend in the contemporary philosophy and science The book presents an experience in integral philosophy of human being Also the development of philosophical anthropology is closely connected with practical tasks Our political activities welfare projects and educational programs can become really useful only when we are guided by knowledge of what human being is what we are able to do what are own needs and what we must become Philosophical anthropology could correctly define the research purposes of all human sciences This volume includes various reflexions and styles of thinking By this all the papers demonstrate metaphysics of respect for human being The contributors scholars from the different countries are open for free discussions and fresh ideas

Time, Self, and Psychoanalysis William W. Meissner, 2007-03-06 This book is a study of time particularly of the nature of subjective time that is time as subjectively experienced and lived in contrast with time as measured objectively as for example by a clock The argument first addresses the development of the time experience its origins in infantile experience and traces its variations and modifications during the course of the life cycle As the life course advances concerns about and preoccupations with death play an increasingly important role in attitudes toward and involvement in temporally related contexts The next step is an examination of the phenomenology of time experience itself and its dependence on biorhythms and affective influences An important aspect of this discussion is the relation between time experience as a conscious phenomenon and the functioning of unconscious determinants of the time experience This leads to the question given these conclusions regarding the nature of time experience what implications can we draw for the understanding of the nature and functioning of the self within psychoanalysis The book s final section applies these understandings to the analytic process focusing particularly on the meaning of the time experience in the patient s psychic reality and patterns of enactment around issues of time and time management in the analytic situation
