Closing the Execution Gap Richard Lepsinger, 2010-06-15 CLOSING THE EXECUTION GAP Once upon a time strategy was king Leaders immersed themselves in the matter of planning how best to achieve their company's goals The subject dominated the attention of senior executives and the writings of consultants and management gurus Experts of various stripes weighed in on how to put strategic planning processes in place and transform employees at all levels into strategic thinkers Naturally leaders assumed all this strategizing would pay off And yet for too many organizations the promised results never came to pass Quite simply they couldn't execute Now the business world has shifted its focus to the consistent delivery of results If an organization can't execute its plans and initiatives nothing else matters not the most solid well thought out strategy not the most innovative business model not even technological breakthroughs that could transform an industry As it turns out the conventional wisdom about what it takes to implement strategy and deliver results isn't all that wise So what really differentiates the companies that are able to get things done day to day and deliver consistent results The answer is found in the pages of Richard Lepsinger's ground breaking book Closing the Execution Gap Based on extensive research and years of practical experience the book outlines five prerequisites for effective execution and five Bridges that differentiate companies that do it best It also describes six Bridge Builders leaders at all levels can use to close the execution gap in their company or team and help people get things done Specifically it addresses What really gets in the way of getting things done for individuals teams and entire companies What leaders can do to enhance their organization's ability to close the execution gap and achieve solid business results What it takes to consistently execute plans and initiatives at a day to day operational level The book features many case studies of companies that have a track record of effective execution Hewlett Packard Costco Procter Gamble and those who have struggled with closing the gap between creating a vision and delivering results Dell American Airlines GM As the business world becomes more competitive and less forgiving execution matters more than ever This is a book for the times we live in and one that for many companies could mean the difference between success and failure

Airline Network Development in Europe and its Implications for Airport Planning Guillaume Burghouwt, 2016-03-23 The ongoing deregulation and liberalization of worldwide air transport markets confronts airport planners with an increasingly problematic context On the one hand the capital intensive large scale and complex airport investments need a detailed long medium term planning of airport infrastructure Such planning requires at least predictable traffic volumes and traffic

composition within the planning horizon On the other hand airline route networks are increasingly dynamic structures that frequently show discontinuous changes As a consequence the much more volatile airport traffic restricts the value of detailed traffic forecasts Volatility of airport traffic and its composition requires flexibility of airport strategies and planning processes The book explores this dilemma through a detailed study of airline network development airport connectivity and airport planning in the deregulated EU air transport market The questions the book seeks to answer are how have airlines responded to the regime changes in EU aviation with respect to the configuration of their route networks what has been the impact of the reconfiguration of airline network configurations for the connectivity of EU airports how can airport planners and airport authorities deal with the increasingly uncertain airline network behaviour in Europe **CIO** ,2004-02-01

"Equality" William N. Spencer,2015-04-22 Equality is the state or quality of being the same in quality or degree evenly proportioned uniform in operation or effect In America today there are many people who pursue their dream of having each and every one of us equal in every way How naive how misguided how dreadfully misinformed and uneducated physiologically psychologically and anatomically Yet this is the prevailing culture in many of our political circles today Far too many laws and regulations are now written or being interpreted as some select groups of people being more equal or less equal than other non select groups of American citizens Perhaps our constitution and bill of rights need to be amended to satisfy this new meaning of equality CIO ,2004 *EBOOK: Crafting and Executing Strategy: The Quest for Competitive Advantage: Concepts and Cases* Arthur Thompson,Alex Janes,Margaret Peteraf,Ciara Sutton,John Gamble,A.
