Bazzell, 2015-05-21 Pascal D Bazzell brings the marginal ecclesiology of a Filipino ecclesial community facing homelessness FECH into contemporary ecclesiological conversation in order to deepen the ecumenical understanding of today's ecclesial reality He contributes relevant data to support a theory of an ecclesial oriented paradigm that fosters ecclesial communities within homeless populations There is an extensive dialogue occurring between ecclesiologies church planting theories or urban missions and the urban poor Yet the situation with the homeless population is almost entirely overlooked The majority of urban mission textbooks do not acknowledge an ecclesial oriented state of being and suggest that the street level environment is a place where no discipleship can occur and no church should exist By presenting the FECH's case study Bazzell emphasizes that it is possible to live on the streets and to grow in the faith of God as an ecclesial community To be able to describe the FECH's ecclesial narrative Bazzell develops a local ecclesiological methodology that aims to bridge the gap between more traditional systematic and theoretical ideal ecclesiology and practical oriented ecclesiology e g congregational studies in order to hold together theological and social understandings of the church in its local reality He articulates a theological framework for the FECH to reflect on who they are the essence of identity studies who they are in relationship to God the essence of theological studies and what that means for believers in that community as they relate to God and to each other in ways that are true to who they are and to who God intends them to be the essence of ecclesial studies The research provides a seldom heard empirical tour into the FECH's social world and communal identity The theological findings from the FECH's hermeneutical work on the Gospel of Mark reveal an understanding of church being developed as gathering around Jesus that creates a space for God's presence to be embodied in their ordinary relationships and activities and to invite others to participate in that gathering Moreover it addresses ecclesial issues of the supernatural world honor shame values and further develop the neglected image of the familia Dei in classical ecclesiology that encapsulates well the FECH's nature mission and place **The Nature of Order, Book Two: The Process of Creating Life** Christopher Alexander, 2020-03-30 Scientifically this is perhaps the most exciting

of the four books How do beautiful creations come into being Nature can make an infinite number of human faces each one unique each one beautiful The same is true for daffodils streams and stars But man made creations especially the towns and buildings of the 20th century have only occasionally been really good more often mediocre and in the last 50 years have most often been deadly What is the reason for the difference It hinges on the deep nature of the processes we use Merely understanding the geometry of beautiful and living form the topic of Book 1 is not enough to help us create such a living geometry In the 20th century our society was locked into deadly processes which created our current built environment process that most people were not really aware of and did not question Despite their best efforts and intentions architects and planners working within these processes could not achieve a living built environment Life and beauty in the built world arise only from processes which allow living structure to unfold The secret lies in knowing as nature does what must happen in what order what sequence of events allows a living form to unfold successfully Here in Book 2 Alexander puts forward a fully developed theory of living process He defines conditions for a process to be living that is capable of generating living structure He shows how such processes work and how they may be created At the core of the new theory is the theory of structure preserving transformations This concept new in scientific thinking is based on the concept of wholeness defined in Book 1 A structure preserving transformation is one which preserves extends and enhances the wholeness of a system Structure preserving transformations provide the means for any step by step process social biological architectural or technical to reach configurations which are most profound most capable of supporting life The process of creation whether in the formation of a single object or in the piecemeal aggregation of a town requires this sort of generative process a careful and deliberate sequence of steps in which each step creates the context for the next one and each next wholeness is derived from the previous wholeness Our billions of beautiful and unique human faces come from one class of sequences Driven by these sequences an initial cell differentiates again and again until beautiful and complex human beings emerge infinitely various always harmonious Making changes in society so that streets buildings rooms gardens and towns may be generated by hundreds of such sequences requires massive transformations This book is the first blueprint of those transformations

*On Our Way to the Seventh Day of Creation* Donnia Treat Bradley, 2017-10-31 One of the most heartbreaking experiences of my life was simply asking people questions about statements in the Bible because my life was about the Word of God

People and preachers rarely had any answer except you have to just have faith With all the suffering in the world as I was a child it did not seem that faith was doing the job So I went in search of my own answers and this book is the surprising result My first surprise was that it seemed the Bible followed Darwins theory up until the creation of humans Also there seemed to be information that followed quantum physics Then I noticed that Genesis gave the entire creation of life from Genesis 1 1 to Genesis 2 4 and then it seemed to start an entirely new book and go into the process of how it was done I spent almost fifty years reading and studying and one day I realized we are still in the sixth day of creation Man has not reached the age of perfection yet This is also in agreement with the ages of man and the ice age It was at this time that I felt compelled to put it into a book
