Carolyn Purnell, 2022-12-15 *Object Lessons* is a series of short beautifully designed books about the hidden lives of ordinary things. Few clothing items are as ubiquitous or casual as blue jeans. Yet their simplicity is deceptive. Blue jeans are nothing if not an exercise in opposites. Americans have accepted jeans as a symbol of their culture, but today jeans are a global consumer product category. Levi Strauss made blue jeans in the 1870s to withstand the hard work of mining, but denim has since become the epitome of leisure. In the 1950s, celebrities like Marlon Brando transformed the utilitarian clothing of industrial labor into a glamorous statement of youthful rebellion, and now you can find jeans on chic fashion runways. For some, indigo blue might be the color of freedom, but for workers who have produced the dye, it has often been a color of oppression and tyranny. *Blue Jeans* considers the versatility of this iconic garment and investigates what makes denim a universal signifier ready to fit any context, meaning, and body. *Object Lessons* is published in partnership with an essay series in *The Atlantic*.

Blue by Fire: A Marker of the Technical History of Glass and Ceramics Howell G. M. Edwards, Philippe Colomban, 2025-01-27 The use of natural mineral and synthetic blue pigments in antiquity for wall paintings and illuminated manuscript historiography evolved into the most suitable blue pigments for the decoration of glazed and enamelled wares: ceramics, glass, and metal, which required a stability at the high temperatures of the kilns used for glazing and firing. Historic literature is often vague regarding the blue pigments used for this purpose. The generic term cobalt blue covers a wide range of pigments that were actually used for the decoration of faience, majolica, stonewares, earthenwares, and porcelains. This book addresses the application of elemental and molecular spectroscopic analytical techniques to a range of diverse problems which arise for decorated ceramics, glass, and enamels, and related artefacts: a history of techniques, provenance, and authentication. The text contains an introduction to the important analytical techniques that are used in destructive and nondestructive analytical measurements and highlights potential future applications based upon novel miniaturised instrumentation for in situ studies. The book is co-authored by two international experts with many years' experience in the application of analysis to artworks and archaeological artefacts and in the investigation of materials and sites for cultural heritage preservation. Among 19 chapters, one is devoted to an evaluation of the analytical techniques that are used and the pitfalls which can arise in the interpretation of the data. The approach conveys the detailed information which has become available from the adoption of analytical techniques to diverse problems through the scientific interrogation of ceramic and related artefacts. Examples are given of how the pigment analysis and sourcing can provide unique information about ancient trade routes and pigment sourcing historically. A classic instance is provided by the transfer of European enamelling technologies carried out at the beginning of the 17th century in Japan (Arita) and at the turn of the 17th-18th centuries in China by the Jesuits established at the Court of respectively the Kyushu island of Satsuma and the Chinese Qing Emperor Kangxi. It has hence been demonstrated that some of the most beautiful porcelains emanating from Japan and China in this

period incorporate blue decoration with pigments supplied from Europe The interpretation of the analytical data can assist museum curators archaeologists art dealers experts and cultural heritage historians in the preservation and conservation of ancient materials which have applied blue pigment decoration *Rarest Blue* Baruch Serman,2012-11-20 Scholar and layman But beyond that it spans a rich spectrum of disciplines in the realms of science and the humanities as it tracks a historical saga across many generations The Stermans have done a masterful job in relating this captivating tale Rabbi Dr Ari Zivotofsky Interdisciplinary Program for Brain Science Bar Ilan UniversityAccording to tradition as described beautifully in *The Rarest Blue* white symbolizes purity and blue the color of the heavens represents holiness The white combined with the blue tekhelet conveys the message that a mortal can indeed achieve a state of holiness and the tekhelet string points the direction to a truly spiritual life Rabbi Dr Abraham J Twerski M D
