Leckie, Lisa M. Given, John E. Buschman, 2010-07-26 This text provides an overview of major critical theorists from across disciplines including the humanities social sciences and education that discusses the importance of these critical perspectives for the advancement of LIS research and scholarship The practical application of library and information science is based upon 75 years of critical theory and thought Therefore it is essential for students and faculty in LIS to be familiar with the work of a wide range of critical theorists The aim of *Critical Theory for Library and Information Science Exploring the Social from Across the Disciplines* is to provide a comprehensive introduction to the critical theorists important to the LIS audience and to give insights into how such theory can be incorporated into actual LIS research and practice This book consists of chapters on individual critical theorists ranging from Aglietta to Habermas to Spivak written by an international group of library and information science scholars Each chapter provides an overview of the theoretical stance and contributions of the theorist as well as relevant critical commentary This book will be particularly valuable as a reference text of core readings for those pursuing doctoral or masters level degrees in LIS      **Religion and the Discourse on Modernity** Paul-François Tremlett, 2011-11-03 The point of departure for this book is the debate about whether religious studies should privilege explanation or understanding Engaging with contemporary scholarship in the field Tremlett argues that the study of religions has always involved the conflation of facts and values and indeed has been structured in advance by the value saturated discourse on disenchanted modernity He argues that phenomenological and post modern approaches to religions lack both theoretical and methodological coherence and in their stead proposes a Marxist approach to religions that is at once empirical and informed by values pertaining to social justice freedom and autonomy      **Culture at the Crossroads** Asma Hichri, Samira Mechri, 2021-06-02 This collection explores the interfaces of culture gender and power from politico religious linguistic legal and historiographic perspectives More importantly the contributions gathered here examine culture's manifestations in different socio economic political theoretical and discursive contexts Being aware of the crisis in humanities researchers scholars and experts seek to relocate culture and cultural

studies within academia and analyze the epistemological relationship between culture and education while also trying to eschew and refashion the stale conventional methodologies of approaching culture as an academic subject Is it possible to go beyond the crisis in humanities by valorizing culture in social and human sciences on the one hand and natural and exact sciences on the other especially when we take into consideration the escalation of fundamentalist extremist and xenophobic tendencies all over the globe How can we approach the issues of ethics and teaching humanities and sciences This book moves beyond conventional conceptions of culture that associate it with knowledge and enlightenment to suggest a holistic view of culture that enacts the dialectics of power nationality class gender and ethnicity in an ever shifting transnational context Engaging readers in a lively intellectual and cultural debate this volume is essential reading for undergraduate and graduate students teachers critics and scholars from various academic fields and disciplines including historiography cultural studies anthropology political science literature and critical theory

**Travelling around Cultures** Zsolt Győri, Gabriella Moise, 2017-01-06 Culture has always relied on art just as artists have been dependent on culture as a problem field to draw inspiration from and as a store of social ideological and political practices to endorse or criticise This volume addresses this dynamic reality by investigating how literary cinematic and artistic practices expose the often invisible structures and discourses which underlie the values concepts rites and myths specific to Anglo American cultural environments On the one hand the chapters re visit classical as well as contemporary authors including Charles Dickens Emily Dickinson Janice Galloway and Matthew Kneale through the lenses of culture to explore how their works become social commentaries and a cultural diagnosis On the other hand they explore the politics and ideological effects of cultural practices exemplified by such matters as censorship reading communities fan fiction and travelogues

**Making Truth in Early Modern Catholicism** Andreea Badea, Bruno Boute, Marco Cavarzere, Steven Broecke, 2025-10-01 Scholarship has come to value the uncertainties haunting early modern knowledge cultures indeed awareness of the fragility and plurality of knowledge is now offered as a key element for understanding early modern science as a whole Yet early modern actors never questioned the possibility of certainty itself and never objected to the notion that truth is out there universal and therefore safe from human manipulation This book investigates how early modern actors managed not to succumb to postmodern relativism despite the increasing uncertainties and blatant disagreements about the nature of God Man and the Universe An international and interdisciplinary team of experts in fields ranging from the history of science to theology and the history of ideas analyses a number of practices that were central to maintaining and functionalizing the notion of absolute truth Through such an interdisciplinary research the book shows how certainty about truth could be achieved and how early modern society recognized the credibility of a wide plethora of actors in differentiating fields of knowledge

seen as valid Lived Experiences and Social Transformations analyses academic and activist encounters with lived experiences arguing that these practices reinforce or disrupt power relations Through the example of UK activists sharing their experiences of poverty Wren Radford advocates for collaborative interventions that emphasise the critical creative knowledges enmeshed in marginalised experiences The book compellingly enacts this approach to practical theology rooted in concrete issues and argued through poetic writing artwork and interdisciplinary sources *Death in the City* Kathryn A. Sloan,2017 At the turn of the twentieth century many observers considered suicide to be a worldwide social problem that had reached epidemic proportions This idea was especially powerful in Mexico City where tragic and violent deaths in public urban spaces seemed commonplace in a city undergoing rapid modernization Crime rates mounted corpses piled up in the morgue and the media reported on sensational cases of murder and suicide More troublesome still a compelling death wish appeared to grip women and youth Drawing on an extensive range of sources from judicial records to the popular press *Death in the City* examines the cultural meanings of death and self destruction in modern Mexico The author examines approaches and responses to suicide and death disproving the long held belief that Mexicans possessed a cavalier response to death Provided by publisher **Continental Philosophy of Technoscience** Hub Zwart,2021-11-18 The key objective of this volume is to allow philosophy students and early stage researchers to become practicing philosophers in technoscientific settings Zwart focuses on the methodological issue of how to practice continental philosophy of technoscience today This text draws upon continental authors such as Hegel Engels Heidegger Bachelard and Lacan and their fields of dialectics phenomenology and psychoanalysis in developing a coherent message around the technicity of science or rather technoscience Within technoscience the focus will be on recent developments in life sciences research such as genomics post genomics synthetic biology and global ecology This book uniquely presents continental perspectives that tend to be underrepresented in mainstream philosophy of science yet entail crucial insights for coming to terms with technoscience as it is evolving on a global scale today This is an open access book *The Cinema of Aki Kaurismäki* Andrew Nestingen,2013-06-25 Since 1983 Aki Kaurismäki has made classically styled films filled with cinephilic references to film history influencing Jim Jarmusch Quentin Tarantino and Wes Anderson Yet the director is often depicted as the loneliest most nostalgic of Finns except when promoting his films making political statements and running his many businesses Drawing on revisionist approaches to film authorship this text links Kaurismäki's work to issues in film aesthetics and history nostalgia late modernity commerce film festivals and national cinema **Learning from Delhi** Written by Maurice Mitchell,Shamoon Patwari,2017-03-02 The inflexibility of modern urban planning which seeks to determine the activities of urban inhabitants and standardise everyday city life is challenged by the unstoppable organic growth of illegal settlements In rapidly expanding cities issues of continuity with local traditions local conditions and local ways of working are juxtaposed with those of abrupt change due to emergency reaction to modernity environmental degradation global market forces and global technological

imperatives to make efforts to control by physical planning redundant as soon as they are enacted In most third world cities there is little social welfare and almost no attempt at social housing
