**Philosophical Psychology** William F. O'Neill, George D. Demos, 2012-09-18 Philosophical Psychology contains many provocative and profound ideas some of which may be sensed as offensive by those with rather thin intellectual skins Some readers in capitalistic societies may take offense at any suggestion that Marx had some good insights about a healthier way to achieve self actualization Others may find it bizarre to read that perhaps Hitler and Stalin were in some ways happier and more self actualized in their roles as brutal tyrants than they would have been in more normal roles The range of ideas and thinkers included in this work is extensive Authors Dr William F O'Neill and Dr George Demos examine essential life issues such as pain pleasure society ethics and love culminating in a careful look at the various aspects of peak experience The chapters build toward a better understanding of the concepts of self actualization and peak experience This is essential reading for upper division and graduate level students seeking to deepen their understanding and apply the concepts of Abraham Maslow's theory of self actualization and its inherent role in education

The Consilient Brain Gerald A. Cory Jr., 2012-12-06 The present work is the third in a series constituting an extension of my doctoral thesis done at Stanford in the early 1970s Like the earlier works The Reciprocal Modular Brain in Economics and Politics Shaping the Rational and Moral Basis of Organization Exchange and Choice Kluwer Academic/Plenum Publishing 1999 and Toward Consilience The Bioneurological Basis of Behavior Thought Experience and Language Kluwer Academic/Plenum Publishing 2000 it may also be considered to respond to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology Ecology as a general field has emerged in the last quarter of the 20th century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions
