The Norman Heritage looks at the Norman Conquest as a turning point in English history The book argues that not only was this the last time that England was successfully invaded but it followed a complete change in the ruling dynasty the introduction of military feudalism the reform of the church and the rapid spread of monasticism The book suggests that such social and political changes were accompanied by dramatic architectural and topographical developments Frenzied building activity resulted in the construction of cathedrals churches monasteries and castles and stone was used on a scale unknown since the end of the Roman Empire The Norman desire to exercise regional political control and to simulate trade resulted in a rash of newly planned towns across the country In many more subtle ways Anglo Saxon landscape was altered and modified by Norman coercion and influence Through their energy and administrative ability the Normans transformed the face of town and country alike and this book traces the impact of the Norman Conquest upon the British scene through both a historical narrative surviving structural remains of buildings and the patterns of settlements communications and land use that developed during this period **An Inventory of the Historical Monuments in Herefordshire ...: Northwest** Royal

Commission on Historical Monuments (England),1934 *Glamorgan and Gwent* Elisabeth Whittle,1992 Through exploring

150 monuments accessible to the public this book aims to encourage an appreciation of such historic sites The examples range from palaeolithic caves at the earliest appearance of man through to the settlements of the mid 16th century AD
