

## LUBRICATION

### ENGINE CRANKCASE

#### Lubricant

Refer to Engine Oil specifications in Section 1 for lubricant recommendations.

#### Checking Lubricant Level

With tractor on level ground, check oil level daily or every 10 hours of operation and replace, if necessary, to maintain level between **FULL-LOW** marks on dip stick. To remove dip stick on gasoline and diesel models, turn handle counterclockwise and remove. Check oil level when engine is stopped. If engine has been in operation, be sure to allow sufficient time for oil to drain into pan before checking level. Dip stick oil filler opening is on left side of engine except on LP gas tractors where dip stick is on left side of engine and oil filler opening is on right side.

#### Changing Lubricant

Crankcase oil change frequency depends heavily upon working conditions. Under normal operating conditions drain gasoline or diesel engine oil every 100 hours of operation and LP gas engine oil every 100 hours of operation. Change oil more often when tractor is operated during winter months or in extreme dust conditions.

Remove drain plug and drain oil while engine is warm so that it will flow freely. Replace drain plug and refill crankcase with recommended lubricant.

### ENGINE OIL FILTER

#### Gasoline and LP Gas

Remove and discard gasoline or LP gas engine oil filter element every second oil change. Remove element from base by turning counterclockwise. Lubricate rubber gasket on new element, part number 100 F10-A, with heavy oil or grease prior to installation. Thread element into base, turning clockwise no more than one-half turn after gasket first contacts base. Check and replace engine oil level after initial operation whenever an element is replaced and check for leakage.
