Protestant Theology and Modernity in the Nineteenth-Century Netherlands Arie L. Molendijk, 2021-12-24 Protestant Theology and Modernity in the Nineteenth Century Netherlands examines how Dutch Protestant thinkers and theologians met the challenges of the rapidly modernizing world around them It shows that the nineteenth century saw theology fundamentally transformed and reinvented in a variety of ways Enlightenment values were fiercely attacked by orthodox Pietists but embraced by modern theologians Positions were not fixed and theologians had to work hard to maintain their intellectual integrity Jewish Isaac da Costa converted to Christianity and fulminated against the Zeitgeist Allard Pierson who in his youth had been under the spell of Da Costa resigned from his ministry and adopted an agnostic stance Abraham Kuyper modernized theology and politics by laying the foundations of pillarization the segmented social structures based on differences in religion and worldview of Dutch society Abraham Kuenen revolutionized the study of the Old Testament and Protestant theologians made ground breaking contributions to the emerging science of religion This book used in depth studies of a small number of significant and influential Protestant thinkers to analyse how they addressed specific modern transformation processes such as political modernization the pluralization of world views and the emergence of critical historical scholarship It also considers the significant Dutch contribution to the historical critical study of the Bible and the emergence of the modern comparative study of religion
