On Looking Eleven Walks With Expert Eyes:

On Looking Alexandra Horowitz, 2013 Alexandra Horowitz's brilliant *On Looking Eleven Walks with Expert Eyes* shows us how to see the spectacle of the ordinary to practice as Sir Arthur Conan Doyle put it the observation of trifles It is structured around a series of eleven walks the author takes with experts on a diverse range of subjects including an urban sociologist a well known artist a geologist a physician and a sound designer She also walks with a child and a dog to see the world as they perceive it What they see and how they see it reveals the startling power of human attention and the cognitive aspects of what it means to be an expert observer Alexandra Horowitz is charmingly adept at explaining the mysteries of human perception as she discovers a feast of fascinating detail all explained with her generous humor and self deprecating tone *On Looking* confirms Alexandra Horowitz's place as one of today's most illuminating observers of our infinitely complex world

Consciência E Paz Escritor Cleber Junior Ferreira Da Silva, 2024-03-25 A LEITURA E UM ASPEQUITO E CONDIÇÃO DE TUDO LEIA LIVRO E BOM LER LIVRO QUE DEUS ABENOA LITERATURA MINI CONTO **On Looking** Alexandra Horowitz, 2013-01-08 From the author of the 1 New York Times giant bestseller *Inside of a Dog* comes an equally smart delightful and startling exploration of how people perceive surroundings In the real world there are worlds within worlds **Wonder and Education** Anders Schinkel, 2020-11-12 Many people whether educators or not will agree that an education that does not inspire wonder is barren Wonder is commonly perceived as akin to curiosity as stimulating inquiry and as something that enhances pleasure in learning but there are many experiences of wonder that do not have an obvious place in education In *Wonder and Education* Anders Schinkel theorises a kind of wonder with less obvious yet fundamental educational importance which he calls contemplative wonder Contemplative wonder disrupts frameworks of understanding that are taken for granted and perceived as natural and draws our attention to the world behind our constructions sparking our interest in the world as something worth attending to for its own sake rather than for our purposes It opens up space for the consideration of radical alternatives wherever it occurs and in many cases is linked with deep experiences of value therefore it is not just important for education in general but also more specifically for moral and political education **Ecologies Design** Maibritt Pedersen Zari, Peter Connolly, Mark Southcombe, 2020-07-07 The notion of ecology has become central to contemporary design discourse This reflects contemporary concerns for our planet and a new understanding of the primary entanglement of the human species with the rest of the world The use of the term ecology with design tends to refer to how to integrate ecologies into design and cities and be understood in a biologically scientific and technical sense In practice this scientific technical knowledge tends to be only loosely employed The notion of ecology is also often used metaphorically in relation to the social use of space and cities This book argues that what it calls the biological and social senses of ecology are both important and require distinctly different types of knowledge and practice It proposes that science needs to be taken much more seriously in biological ecologies and that social ecologies can now be understood

non metaphorically as assemblages Furthermore this book argues that design practice itself can be understood much more rigorously productively and relevantly if understood ecologically The plural term ecologies design refers to these three types of ecological design This book is unique in bringing these three perspectives on ecological design together in one place It is significant in proposing that a strong sense of ecologies design practice will only follow from the interconnection of these three types of practice Ecologies Design brings together leading international experts and relevant case studies in the form of edited research essays case studies and project work It provides an overarching critique of current ecologically oriented approaches and offers evidence and exploration of emerging and effective methods techniques and concepts It will be of great interest to academics professionals and students in the built environment disciplines Overcrowded Roberto Verganti,2017-02-03 A more powerful innovation which seeks to discover not how things work but why we need things The standard text on innovation advises would be innovators to conduct creative brainstorming sessions and seek input from outsiders users or communities This kind of innovating can be effective at improving products but not at capturing bigger opportunities in the marketplace In this book Roberto Verganti offers a new approach one that does not set out to solve existing problems but to find breakthrough meaningful experiences There is no brainstorming which produces too many ideas unfiltered but a vision subject to criticism It does not come from outsiders but from one person s unique interpretation The alternate path to innovation mapped by Verganti aims to discover not how things work but why we need things It gives customers something more meaningful something they can love Verganti describes the work of companies including Nest Labs Apple Yankee Candle and Philips Healthcare that have created successful businesses by doing just this Nest Labs for example didn t create a more advanced programmable thermostat because people don t love to program their home appliances Nest s thermostat learns the habits of the household and bases its temperature settings accordingly Verganti discusses principles and practices methods and implementation The process begins with a vision and proceeds through developmental criticism first from a sparring partner and then from a circle of radical thinkers then from external experts and interpreters and only then from users Innovation driven by meaning is the way to create value in our current world where ideas are abundant but novel visions are rare If something is meaningful for both the people who create it and the people who consume it business value follows WHOLE Melissa Moore,Michele Matrisciani,2016-09-13 A five point plan to usher you through heartache and toward a stronger healthier place I know how to kill someone and get away with it The words spoken by her father when Melissa was a teen haunt her to this day Two years later after confessing that he was the serial killer nationally known as the Happy Face Killer Keith Jesperson was arrested for the murder of eight women The pain guilt and shame that followed her father s conviction stigmatized Melissa for years until she figured out a way to use her emotions as fuel to free herself from self imposed limits and set out on a journey to rebuild her fragmented life Through her work as an Emmy nominated investigative journalist television host educator and advocate Melissa created WHOLE a five

step program to better develop her own approach to healing Watch the Storm Heal Your Heart Open Your Mind Leverage Your Power and Elevate Your Spirit Among other things she found that the commitment to your core values makes all the difference in getting unstuck that forgiveness gives the greatest chance of making a future not defined by the past that there is great value in vulnerability that creativity is essential to living a full life and that hope is the basis for everything we feel believe and do In each phase of the program Melissa inspires you to embrace your past to find wholeness within the parts of your life that you believe to be broken If you are stuck in the rut of a painful experience whether depression trauma pain fear addiction or guilt you will find comfort in this book s advice self evaluation and action plans WHOLE is a powerful journey of recovery and awakening that reframes the pain experience so it can be used as a way to invite understanding growth and transformation into your life

Walking Through Social Research Charlotte Bates,Alex Rhys-Taylor,2017-04-11 As an ethnographic method walking has a long history but it has only recently begun to attract focused attention By walking alongside participants researchers have been able to observe experience and make sense of a broad range of everyday practices At the same time the idea of talking and walking with participants has enabled research to be informed by the landscapes in which it takes place By sharing conversations in place and at the participants pace sociologists are beginning to develop both a feel for and a theoretical understanding of the transient embodied and multisensual aspects of walking The result as this collection demonstrates is an understanding of the social world evermore congruent with people s lived experiences of it This interdisciplinary collection comprises a unique journey through a variety of walking methodologies The collection highlights a range of possibilities for enfolding sound smell emotion movement and memory into our accounts illustrating the sensuousness skill pitfalls and rewards of walking as a research practice Each chapter draws on original empirical research to present ways of walking and to discuss the conceptual practical and technical issues that walking entails Alongside feet on the ground the devices and technologies that make up hybrid research mobilities are brought to attention The collection is bookended by two short pedestrian essays that take the reader on illustrative urban walks suggesting routes through the city as well as ways in which the reader might make their own path through walking methods An innovative title Walking Through Social Research will be of interest to undergraduate and postgraduate students researchers and academics who are interested in Sociology Geography Cultural Studies Urban Studies and Qualitative Research Methods

Noticing Ziyad Marar,2025-09-04 What does it mean to notice something To really see it In his exhilarating quest to help us notice better Ziyad Marar poses a deceptively simple question what are you good at noticing In the process of noticing what we notice we re attune to questions of perception orientation and above all attention How do we walk the wrong way down the street without being aware of it What is happening in us when our eyes pass unseeing over a familiar face in a crowded restaurant Are we looking up into the sky or down at the ground And when we notice what we notice and what we overlook what do we learn about ourselves In a triple corkscrew of philosophy psychology and art

particularly literature Marar unwinds the impenetrable tangles of noticing in a world replete with distractions interruptions and at times horror Invisible gorillas con artists and magicians are among the unlikely assistants enlisted in the task of trying to work out not just what noticing is but what it could be a practice of deeply minded attention of thoughtful witnessing In the end our noticing is tied up with the very core of our humanity the capacity to connect to care to attend to others and the world

London's Urban Landscape Christopher Tilley, 2019-05-07 London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape Edited by Christopher Tilley the volume is inspired by phenomenological thinking and presents fine grained ethnographies of the practices of everyday life in London In doing so it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture The first part of the volume considers the residential sphere of urban life discussing in detailed case studies ordinary residential streets housing estates suburbia and London's mobile linear village of houseboats The second part analyses the public sphere including ethnographies of markets a park the social rhythms of a taxi rank and graffiti and street art London's Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places and the paths of movement between them What stories do door bells and house facades tell us about contemporary life in a Victorian terrace How do antiques acquire value and significance in a market How does living in a concrete megastructure relate to the lives of the people who dwell there These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life
