On Some Classes Of Modules And Their Endomorphism Ring:

On Some Classes of Modules and Their Endomorphism Rings ,2014   **On Some Classes of Modules and Their Endomorphism Ring** Mai Hoang Bien,2014-09-29 The first aim of this book is to generalize this result from indecomposable modules to square free ones by showing that an injective module is square free if and only if its endomorphism ring is quasi duo The second aim is to describe all maximal right left two sided ideals of the endomorphism ring of an arbitrary injective module And the third aim is to study two classes of modules Loewy modules with finite Loewy invariants over an arbitrary ring and max modules with finite radical invariants over a semilocal ring   Abelian Groups and Modules Alberto Facchini,Claudia Menini,2012-12-06 On the 26th of November 1992 the organizing committee gathered together at Luigi Salce s invitation for the first time The tradition of abelian groups and modules Italian conferences Rome 77 Udine 85 Bressanone 90 needed to be kept up by one more meeting Since that first time it was clear to us that our goal was not so easy In fact the main intended topics of abelian groups modules over commutative rings and non commutative rings have become so specialized in the last years that it looked really ambitious to fit them into only one meeting Anyway since everyone of us shared the same mathematical roots we did want to emphasize a common link So we elaborated the long symposium schedule three days of abelian groups and three days of modules over non commutative rings with a two days bridge of commutative algebra in between Many of the most famous names in these fields took part to the meeting Over 140 participants both attending and contributing the 18 Main Lectures and 64 Communications see list on page xv provided a really wide audience for an Algebra meeting Now that the meeting is over we can say that our initial feeling was right

Noncommutative Rings, Group Rings, Diagram Algebras and Their Applications Surender Kumar Jain,S. Parvathi,Dinesh Khurana,2008 Articles in this volume are based on talks given at the International Conference on Noncommutative Rings Group Rings Diagram Algebras and Their Applications The conference provided researchers in mathematics with the opportunity to discuss new developments in these rapidly growing fields This book contains several excellent articles both expository and original with new and significant results It is suitable for graduate students and researchers interested in Ring Theory Diagram Algebras and related topics   **Rings and Categories of Modules** Frank W. Anderson,Kent R. Fuller,2012-12-06 This book is intended to provide a reasonably self contained account of a major portion of the general theory of rings and modules suitable as a text for introductory and more advanced graduate courses We assume the familiarity with rings usually acquired in standard undergraduate algebra courses Our general approach is categorical rather than arithmetical The continuing theme of the text is the study of the relationship between the one sided ideal structure that a ring may possess and the behavior of its categories of modules Following a brief outline of set theoretic and categorical foundations the text begins with the basic definitions and properties of rings modules and homomorphisms and ranges through comprehensive treatments of direct sums finiteness conditions the Wedderburn Artin Theorem the Jacobson radical

the hom and tensor functions Morita equivalence and duality de composition theory of injective and projective modules and semi perfect and perfect rings In this second edition we have included a chapter containing many of the classical results on artinian rings that have hdped to form the foundation for much of the contemporary research on the representation theory of artinian rings and finite dimensional algebras Both to illustrate the text and to extend it we have included a substantial number of exercises covering a wide spectrum of difficulty There are of course many important areas of ring and module theory that the text does not touch upon   Ring Theory And Algebraic Geometry A. Granja,J.A. Hermida Alonso,A Verschoren,2001-05-08 Focuses on the interaction between algebra and algebraic geometry including high level research papers and surveys contributed by over 40 top specialists representing more than 15 countries worldwide Describes abelian groups and lattices algebras and binomial ideals cones and fans affine and projective algebraic varieties simplicial and cellular complexes polytopes and arithmetics   *Modules over Discrete Valuation Rings* Piotr A. Krylov,Askar A. Tuganbaev,2018-09-24 This book provides the first systematic treatment of modules over discrete valuation domains which play an important role in various areas of algebra especially in commutative algebra Many important results representing the state of the art are presented in the text along with interesting open problems This updated edition presents new approaches on p adic integers and modules and on the determinability of a module by its automorphism group Contents Preliminaries Basic facts Endomorphism rings of divisible and complete modules Representation of rings by endomorphism rings Torsion free modules Mixed modules Determinity of modules by their endomorphism rings Modules with many endomorphisms or automorphisms   *Canadian Mathematical Bulletin* ,1989-06   **Endomorphism Rings of Abelian Groups** P.A. Krylov,Alexander V. Mikhalev,A.A. Tuganbaev,2013-06-29 Every Abelian group can be related to an associative ring with an identity element the ring of all its endomorphisms Recently the theory of endomor phism rings of Abelian groups has become a rapidly developing area of algebra On the one hand it can be considered as a part of the theory of Abelian groups on the other hand the theory can be considered as a branch of the theory of endomorphism rings of modules and the representation theory of rings There are several reasons for studying endomorphism rings of Abelian groups first it makes it possible to acquire additional information about Abelian groups themselves to introduce new concepts and methods and to find new interesting classes of groups second it stimulates further develop ment of the theory of modules and their endomorphism rings The theory of endomorphism rings can also be useful for studies of the structure of additive groups of rings E modules and homological properties of Abelian groups The books of Baer 52 and Kaplansky 245 have played an important role in the early development of the theory of endomorphism rings of Abelian groups and modules Endomorphism rings of Abelian groups are much stu died in monographs of Fuchs 170 172 and 173 Endomorphism rings are also studied in the works of Kurosh 287 Arnold 31 and Benabdallah 63   *Modules over Discrete Valuation Domains* Piotr A. Krylov,Askar A. Tuganbaev,2008-08-27 This book provides the first systematic treatment of modules over discrete valuation domains which

plays an important role in various areas of algebra especially in commutative algebra Many important results representing the state of the art are presented in the text which is supplemented by exercises and interesting open problems An important contribution to commutative algebra **Algebra, K-Theory, Groups, and Education** Hyman Bass,Tsit-Yuen Lam,Andy R. Magid,1999 This volume includes expositions of key developments over the past four decades in commutative and non commutative algebra algebraic K theory infinite group theory and applications of algebra to topology Many of the articles are based on lectures given at a conference at Columbia University honoring the 65th birthday of Hyman Bass Important topics related to Bass s mathematical interests are surveyed by leading experts in the field Of particular note is a professional autobiography of Professor Bass and an article by Deborah Ball on mathematical education The range of subjects covered in the book offers a convenient single source for topics in the field **Model Theory of Modules, Algebras and Categories** Alberto Facchini,Lorna Gregory,Sonia L'Innocente,Marcus Tressl,2019-05-31 This volume contains the proceedings of the international conference Model Theory of Modules Algebras and Categories held from July 28 August 2 2017 at the Ettore Majorana Foundation and Centre for Scientific Culture in Erice Italy Papers contained in this volume cover recent developments in model theory module theory and category theory and their intersection Encyclopaedia of Mathematics (set) Michiel Hazewinkel,1994-02-28 The Encyclopaedia of Mathematics is the most up to date authoritative and comprehensive English language work of reference in mathematics which exists today With over 7 000 articles from A integral to Zygmund Class of Functions supplemented with a wealth of complementary information and an index volume providing thorough cross referencing of entries of related interest the Encyclopaedia of Mathematics offers an immediate source of reference to mathematical definitions concepts explanations surveys examples terminology and methods The depth and breadth of content and the straightforward careful presentation of the information with the emphasis on accessibility makes the Encyclopaedia of Mathematics an immensely useful tool for all mathematicians and other scientists who use or are confronted by mathematics in their work The Enclyclopaedia of Mathematics provides without doubt a reference source of mathematical knowledge which is unsurpassed in value and usefulness It can be highly recommended for use in libraries of universities research institutes colleges and even schools Algebras, Rings And Their Representations - Proceedings Of The International Conference On Algebras, Modules And Rings Alberto Facchini,Kent Fuller,Claus M Ringel,Catarina Santa-clara,2006-02-20 Surveying the most influential developments in the field this proceedings reviews the latest research on algebras and their representations commutative and non commutative rings modules conformal algebras and torsion theories The volume collects stimulating discussions from world renowned names including Tsit Yuen Lam Larry Levy Barbara Osofsky and Patrick Smith **Representation Theory of Finite Groups and Finite-Dimensional Algebras** Michler,Ringel,2012-12-06 From April 1 1984 until March 31 1991 the Deutsche Forschungsgemeinschaft has sponsored the project Representation Theory of Finite Groups and Finite Di mensional Algebras The proposal for this project was submitted

by B Huppert Mainz B Fischer Bielefeld G Michler Essen H Pahlings Aachen and C M Ringel Bielefeld in order to strengthen the interaction between the different re search areas in representation theory The Deutsche Forschungsgemeinschaft has given many research positions and fellowships for young algebraists enabling them to do research at their own uni versities or as visitors at well known research institutions in America Australia England and France The whole project benefitted very much from an extensive exchange programme between German and American scientists sponsored by the Deutsche Forschungsgemeinschaft and by the National Science Foundation of the United States This volume presents lectures given in a final conference and reports by members of the project It is divided into two parts The first part contains seven survey articles describing recent advances in different areas of representation theory These articles do not only concentrate on the work done by the German research groups but also inform on major developments of the subject at all The volume omits those topics already treated in book form In particular it does not contain a survey on K **Extending Modules** Nguyen Viet Dung,2019-01-22 Module theory is an important tool for many different branches of mathematics as well as being an interesting subject in its own right Within module theory the concept of injective modules is particularly important Extending modules form a natural class of modules which is more general than the class of injective modules but retains many of its

On the Local Structure of Morita and Rickard Equivalences between Brauer Blocks Lluis Puig,2012-12-06 Brauer had already introduced the defect of a block and opened the way towards a classification by solving all the problems in defects zero and one and by providing some evidence for the finiteness of the set of blocks with a given defect In 1959 he discovered the defect group and in 1964 Dade determined the blocks with cyclic defect groups In 1978 Alperin and Brou discovered the Brauer category and Brou and the author determined the blocks having a nilpotent Brauer category In 1979 the author discovered the source algebra which determines all the other current invariants representing faithfully the block and found its structure in the nilpotent blocks Recently the discovery by Rickard that all blocks with the same cyclic defect group and the same Brauer category have the same homotopic category focussed great interest on the new loose relationship between blocks called Rickard equivalence This book describes the source algebra of a block from the source algebra of a Rickard equivalent block and the source of the Rickard equivalence **Rings, Modules and Codes** André Leroy,Christian Lomp,Sergio López-Permouth,Frédérique Oggier,2019-04-12 This book contains the proceedings of the Fifth International Conference on Noncommutative Rings and their Applications held from June 12 15 2017 at the University of Artois Lens France The papers are related to noncommutative rings covering topics such as ring theory with both the elementwise and more structural approaches developed module theory with popular topics such as automorphism invariance almost injectivity ADS and extending modules and coding theory both the theoretical aspects such as the extension theorem and the more applied ones such as Construction A or Reed Muller codes Classical topics like enveloping skewfields weak Hopf algebras and tropical algebras are also presented **Ring Theory and Its Applications** Dinh Van Huynh, S. K. Jain, Sergio R.

López-Permouth,S. Tariq Rizvi,Cosmin S. Roman,2014-02-21 This volume contains the proceedings of the Ring Theory Session in honor of T Y Lam s 70th birthday at the 31st Ohio State Denison Mathematics Conference held from May 25 27 2012 at The Ohio State University Columbus Ohio Included are expository articles and research papers covering topics such as cyclically presented modules Eggert s conjecture the Mittag Leffler conditions clean rings McCoy rings QF rings projective and injective modules Baer modules and Leavitt path algebras Graduate students and researchers in many areas of algebra will find this volume valuable as the papers point out many directions for future work in particular several articles contain explicit lists of open questions   Canadian Journal of Mathematics ,1988-08
