Healing Identities Cynthia Burack, 2018-08-06. Group identifications famously pose the problem of destructive rhetoric and action against others. Cynthia Burack brings together the theory work of women of color and the tools of psychoanalysis to examine the effects of group collaborations for social justice and progressive politics. This juxtaposition illuminates some assumptions about race and equality encoded in psychoanalysis. Burack's discursive analysis suggests the positive identity-affirming aspects of group relational life for African American women. One analytic response to groups emphasizes the dangers of these identifications and exhorts people to abandon or transcend them for their own good and for the good of others who may be harmed by group-based forms of cultural or material violence. Another response understands that people feel a need for group identifications and asks how they may be made more resistant to malignant group-based discourse and action. What can black feminist thought teach scholars and democratic citizens about groups? Burack shows how the rhetoric of black feminism models reparative rather than destructive forms of group dialogue and action. Although it may be impossible to eliminate group identifications that provide much of the impetus for bias and violence, she argues, we can encourage more progressive forms of leadership, solidarity, and coalition politics.

Feminist Theories of Crime Merry Morash, 2017-07-05. This collection reimagines the field of criminology with insights gleaned from feminist theory. Works included here illustrate that gender is a key organizing principle of social life. This means that men and women have gender, that patriarchy as well as gender must be theorized, and that other systems of oppression such as race and class must also be studied to fully understand the crime problem and the criminal justice system. Finally, the articles collected here exemplify the feminist concern for thinking consciously about how and why we do our research with the crucial goal of producing knowledge that will promote social justice.

Talkies, Road Movies and Chick Flicks Heidi Wilkins, 2016-02-19. The representation of gender in film remains an intensely debated topic, particularly in academic considerations of US mainstream cinema where it is often perceived as perpetuating rigid binary views of gender and reinforcing patriarchal dominant notions of masculinity and femininity. While previous scholarly discussion has focused on visual or narrative portrayals of gender, this book considers the ways that film sound—music, voice, sound effects, and silence—is used to represent gender. Taking a socio-historical approach, Heidi Wilkins investigates a range of popular US genres, including screwball comedy, the road movie, and chick flicks, to explore the ways that film sound can reinforce traditional assumptions about masculinity and femininity, impart ambivalent meanings to them,

or even challenge and subvert the notion of gender itself Case studies include His Girl Friday Easy Rider and Bridesmaids
