The Oxford Handbook of Food History Jeffrey M. Pilcher, 2012-10-16. Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism, the environment, and social inequality to diverse audiences. Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald's menus, contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself. The Oxford Handbook of Food History places existing works in historiographical context, crossing disciplinary, chronological, and geographic boundaries while also suggesting new routes for future research. The twenty-seven essays in this book are organized into five sections: historiography, disciplinary approaches, production, circulation, and consumption of food. The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself, such as the French Annales school and the cultural turn, but also in anthropology, sociology, geography, pedagogy, and the emerging Critical Nutrition Studies. The following three sections sketch various trajectories of food as it travels from farm to table, factory to eatery, nature to society. Each section balances material, cultural, and intellectual concerns, whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents, early human migrations with modern culinary tourism, or religious customs with social activism. In its vast interdisciplinary scope, this handbook brings students and scholars an authoritative guide to a field with fresh insights into one of the most fundamental human concerns.

Rebellious Cooks and Recipe Writing in Communist Bulgaria Albena Shkodrova, 2021-01-28 How did people exist and resist in their daily lives under Soviet control in the Cold War period Shkodrova's monograph shows how in communist Bulgaria many women passionately exchanged recipes with friends and strangers to build substantial and impressive private collections of recipes This activity was borderline contraband in going against the general disapproval of home cooking that formed part of the ideology of communism in which home cooking was considered household slavery and an agent of patriarchalism Private recipe collections were by far the preferred written source of culinary information more popular than the state approved commercial cookbooks Shkodrova shows how these recipe collections held many different meanings for the women who collected them from helping to navigate the communist economy to enabling new friendships to be developed while engaging safely in power relations and cultivating a sense of individual identity in a society where collective existence was prioritised

and exalted Drawing on primary sources including scrapbook cookbooks and working from the establishment of cookery classes before communism and their obliteration thereafter Shkodrova presents a structured outline of the meanings of recipes exchange and home cooking for Bulgarian women under communism
