Mothers On Trial The Battle For Children And Custody:

Mothers on Trial Phyllis Chesler, 2011-07-01 Completely updated and revised for the twenty first century Mothers on Trial remains the bible for all women facing a custody battle as well as the lawyers psychologists and others who support them This landmark book was the first to break the false stereotype about mothers getting preferential treatment over fathers when it comes to custody In this new edition Chesler shows that with few exceptions the news has only gotten worse when both the father and the mother want custody the father usually gets it The highly praised Mothers on Trial is essential reading for anyone concerned personally or professionally with custody rights and the well being of our children

Mothers on Trial Phyllis Chesler, 1991 **Radical Visionaries: Feminist Therapy Pioneers, 1970-1975** Claudia Pitts, Debra M. Kawahara, 2018-10-08 Radical Visionaries documents and honours those feminist therapy pioneers of the 1970s who moved the mental health establishment and possibly the world through radical action to begin to consider women as fully human It is remarkable today even in these difficult times to realize how far we have come and to know it was these women who galvanized this move forward toward self exploration and equality As we move into the current era of feminism and social justice it is imperative to pause to consider how these second wave feminist pioneers gave us feminist therapy and all that followed from it From the earliest stages of the movement feminists used consciousness raising which moved into the notion of the egalitarian therapy and ultimately led toward a cultural shift towards female empowerment and the groundswell of women into clinical psychology programs These founding feminist therapists impacted structures including the criminal justice system divorce proceedings domestic violence services education medicine and banking This book highlights these women's stories told by the pioneers themselves as they forged the trail for those of us who follow them This book was originally published as a special issue of Women Therapy *Feminist Foremothers in Women's Studies, Psychology, and Mental Health* Ellen Cole, Esther D Rothblum, Phyllis Chesler, 2014-05-12 Feminist Foremothers in Women's Studies Psychology and Mental Health is by and about the more recent wave of feminist foremothers those who were awakened in the 1960s and 70s to the realization that something was terribly wrong These are the women who created the fields of feminist therapy feminist psychology and women's mental health as they exist today The 48 women share their life stories in the hope that they will inspire and encourage readers to take their own risks and their own journeys to the outer edges of human possibility Authors write about what led up to their achievements what their accomplishments were and how their lives were consequently changed They describe their personal stages of development in becoming feminists from unawareness to activism to action Some women focus on the painful barriers to success fame and social change others focus on the surprise they experience at how well they and the women's movement have done Some well known feminist foremothers featured include Phyllis Chesler Gloria Steinem Kate Millett Starhawk Judy Chicago Zsuzsanna Emese Budapest Andrea Dworkin Jean Baker Miller Carol Gilligan In Feminist Foremothers in Women's Studies Psychology and Mental Health

many of the women see in hindsight how prior projects and ideas and even dreams were the forerunners to their most important work. They note the importance of sisterhood and the presence of other women and the loneliness and isolation experienced when they don't exist. They note the validation they have received from grassroots feminists in contrast to disbelief from professionals. Although these women have been and continue to be looked up to as foremothers, they realize how little recognition they've been given from society at large and how much better off their male counterparts are. Some foremothers write about the feeling of being different, not meshing with the culture of the time and about challenging the system as an outsider, not an insider. These are women who had few mentors who had to forge their own way, hit the ground running. Their stories will challenge readers to press on to continue the work these foremothers so courageously started. Throughout the pages of *Feminist Foremothers in Women's Studies Psychology and Mental Health*, runs a sense of excitement and vibrancy of lives lived well, of being there during the early years of the women's movement, of making sacrifices, of taking risks and living to see enormous changes result. Throughout these pages too sounds a call not to take these changes for granted but to recognize that feminists rather than arguing over picayune issues or splitting politically correct hairs are battling for the very soul of the world.

[Encyclopedia of Women and Gender](#), **Encyclopedia of Women and Gender, Two-Volume Set** Judith Worell, 2001-10-16 The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences. Along the way it was discovered that while women very often think and behave differently than do men, industrialized societies cater to masculine perspectives. The Psychology of Women emerged as a field of study focusing on just those areas in which women most often butted against assumed roles. And similarly in the 1990s the Psychology of Men emerged to focus on the same issues for men. The Encyclopedia of Gender covers all three areas under one cover, discussing psychological differences in personality, cognition and behavior as well as biologically based differences and how those differences impact behavior. Coverage includes studies of these differences in applied settings such as education, business, the home, in politics, sports, competition, etc. Key Features: Over 100 in-depth chapters by leading scholars in the psychology of women and gender. Addresses critical questions of similarities and differences in gendering across diverse groups, challenging myths about gender polarization and the Venus/Mars distinction. Broad coverage of topics from theory and method to development, personality, violence, sexuality, close relationships, work, health and social policy. Sensitive attention to multicultural and cross-cultural research. Clearly written, readable, comprehensive with helpful guides, outline, glossary, reference list. Raises difficult questions related to power, inequality, ethics and social justice. Challenges the reader to revise established truths and to seek further information. Maintains a feminist and woman-centered focus.

The New Don't Blame Mother Paula Caplan, 2002-06-01 In 1990 Paula Caplan, a nationally recognized expert on the psychology of women, wrote the groundbreaking *Don't Blame Mother*. Now almost ten years later she finds that we are still blaming mothers. Fully revised

updated with a new introduction this second edition proposes new ways of mending the mother daughter relationship The New Don't Blame Mother Mending the Mother Daughter Relationship shows us that dangerous myths about mothers pervade our culture and have created or aggravated many of the problems between mothers and daughters Myths of the Perfect Mother give rise to impossible expectations and set mothers up for failure good mothers don't get angry good mothers are endlessly giving and myths of the Bad Mother exaggerate mothers failings and create a monster figure in her image mothers are too needy mothers can't let go Caplan shows that if women can identify these myths then they can take concrete steps to build a strong and loving relationship with their mothers The New Don't Blame Mother shows how the anger and agony of the mother daughter relationship can be replaced with a new bond based on understanding and respect The New Don't Blame Mother is a must read for all mothers and daughters Caplan drawing on over twenty five years of research clinical practice and the experience of workshop participants will show you how to stop blaming mother and instead start loving her
