Mick Walker,2013-01-20 For the first half of the 20th century Great Britain led the world in motorcycle design and production exporting its products to countries in every section of the globe However as the second half of the century began in 1960 this once great industry commenced what was to be a terminal decline During the 1960s and 70s Britain still manufactured a wide range of machines but a combination of poor management lack of investment foreign competition notably from Japan and the arrival of the small affordable car transpired to effectively sound the death knell of the British motorcycle by the end of the 1970s *Culture on Two Wheels* Jeremy Withers,Daniel P. Shea,2016 Bicycles have more cultural identities than many realize functioning not only as literal vehicles in a text but also as vehicles for that text s themes ideas and critiques In the late nineteenth century the bicycle was seen as a way for the wealthy urban elite to reconnect with nature and for women to gain a measure of personal freedom while during World War II it became a utilitarian tool of the French Resistance and in 1970s China stood for wealth and modernization Lately it has functioned variously as the favored ideological steed of environmentalists a means of community bonding and aesthetic self expression in hip hop and the ride of choice for bike messenger idolizing urban hipsters *Culture on Two Wheels* analyzes the shifting cultural significance of the bicycle by examining its appearances in literary musical and cinematic works spanning three continents and more than 125 years of history Bringing together essays by a variety of cyclists and scholars with myriad angles of approach this collection highlights the bicycle s flexibility as a signifier and analyzes the appearance of bicycles in canonical and well known texts such as Samuel Beckett s modernist novel *Molloy* the Oscar winning film *Breaking Away* and various Stephen King novels and stories as well as in lesser known but equally significant texts such as the celebrated Russian director Andrei Tarkovsky s film *Sacrifice* and Elizabeth Robins Pennell s nineteenth century travelogue *A Canterbury Pilgrimage* the latter of which traces the route of Chaucer s pilgrims via bicycle *Techno-Fixers* Sean F. Johnston,2020-03-26 This is the story of a seductive idea Over the past century the potential of new technology to solve social dilemmas has captivated modern culture From apps that encourage physical activity to airport scanners meant to prevent terrorism the concept that clever innovation can improve society is irresistible but faith in such technological fixes is seldom questioned Where did this idea come from what makes it so appealing and how does it endanger our future *Techno Fixers* traces the source of modern confidence in technology to engineering hubris radical utopian movements science fiction fanzines policy makers soundbites corporate marketing and optimistic consumer culture from the turn of the twentieth century until today Sean Johnston demonstrates that through the promotion of prominent government scientists technocrats entrepreneurs and popular media modern invention became the favourite tool for addressing human problems and society s ills Nonetheless when it comes to assessing the success of cigarette filters as the solution to safe smoking or DDT as the answer for agricultural productivity the evidence is sobering Cautioning that the rhetoric of technological fixes seldom matches reality Johnston examines how employing innovation to bypass traditional methods can foster as many problems as it solves A critical examination of modern faith in

technology Techno Fixers evaluates past mistakes present implications and future opportunities for innovating societies

The War of the Wheels Jeremy Withers, 2017-04-13 Amid apocalyptic invasions and time travel one common machine continually appears in H G Wells's works the bicycle From his scientific romances and social comedies to utopias futurological speculations and letters Wells's texts abound with bicycles In *The War of the Wheels* Withers examines this mode of transportation as both something that played a significant role in Wells's personal life and as a literary device for creating elaborate characters and complex themes Withers traces Wells's ambivalent relationship with the bicycle throughout his writing While he celebrated it as a singular and astonishing piece of technology and continued to do so long after his contemporaries abandoned their enthusiasm for the bicycle he was not an unwavering promoter of this machine Wells acknowledged the complex nature of cycling its contribution to a growing dependence on and fetishization of technology and its role in humanity's increasing sense of superiority Moving into the twenty first century Withers reflects on how the works of H G Wells can serve as a valuable locus for thinking through many of our current issues and problems related to transportation mobility and sustainability
