Sides,2017-09-15 Thoroughly updated to discuss the use of tools such as Skype and social media this concise volume shows how effective communication via written text and spoken presentations can positively impact project management in professional environments Professional communications are the information product of all organizations and businesses Based on that premise this book offers communications strategies that will benefit any organization that disseminates technical information in house and or to customers The popular work provides easy to understand and apply guidelines for designing and writing effective technical documents as well as other related communications What makes this new edition especially valuable is that it maintains the quality of information that distinguished the previous editions but is now updated to encompass current technology and trends including today s prevalent communication tools such as social media The book begins by looking at skills common to all technical writing and offering general advice on designing and writing reports Next is a discussion of specific types of reports along with common problems and issues writers face Finally the work overviews other forms of communications such as professional presentations The updated material also considers the growing importance of interviews and focus groups as information gathering tools the influence of visual rhetoric and the use of technologies such as Skype and webinars    **Essential Circuits Reference Guide** John Markus,Charles D. systems from companies like Digital NEC and PCvendors offering PowerPC systems for NT. The basic operating system consists of a user interface shell similar in appearance to Windows 3.1 for NT 3.1 to 3.5 and changing to look and feel more like Windows 95 for NT 4.0 designed to run 32 bit programs. This makes it ideal for the multi media nature of Web browsers and for the heavy duty requirements of a Web server. There are a number of elements in the OS that are special to NT. These include the control panels and administrative support tools relating to NT's services and support mechanisms. TCP/IP is included for Internet access through traditional networks. You can also connect from Windows NT Workstation via MS Remote Access to any Internet Access Provider supporting PPP. Basic requirements for Windows NT Workstation are a 486 system with at least 8 MB of RAM although 16 MB is recommended. The client software needed to connect to a corporate server is included as is the Remote Access software mentioned earlier.
