Panama in Black Kaysha Corinealdi, 2022-08-08 In Panama in Black Kaysha Corinealdi traces the multigenerational activism of Afro Caribbean Panamanians as they forged diasporic communities in Panama and the United States throughout the twentieth century Drawing on a rich array of sources including speeches yearbooks photographs government reports radio broadcasts newspaper editorials and oral histories Corinealdi presents the Panamanian isthmus as a crucial site in the making of an Afro diasporic world that linked cities and towns like Col n Kingston Panam City Brooklyn Bridgetown and La Boca In Panama Afro Caribbean Panamanians created a diasporic worldview of the Caribbean that privileged the potential of Black innovation Corinealdi maps this innovation by examining the longest running Black newspaper in Central America the rise of civic associations created to counter policies that stripped Afro Caribbean Panamanians of citizenship the creation of scholarship granting organizations that supported the education of Black students and the emergence of national conferences and organizations that linked anti imperialism and Black liberation By showing how Afro Caribbean Panamanians used these methods to navigate anti Blackness xenophobia and white supremacy Corinealdi offers a new mode of understanding activism community and diaspora formation National Interests And Presidential Leadership Donald E. Nuechterlein, 2019-04-10 Many scholars have ignored the concept of national interest simply because no logical systematic means of dealing with this key aspect of international politics has been available A new approach to defining national interest forms the basis for this study of presidential decisions on U S involvement in foreign wars Professor Nuechterlein looks at

various crisis situations to determine what defense economic world order and ideological interests are at stake he identifies sixteen cost risk and value factors that affect the U S view of which interest is most vital in a given situation In any dispute it is the interest that is considered vital too important to compromise that is the key element in crisis decisions Professor Nuechterlein uses his analytical framework to examine the ways Presidents Wilson Roosevelt Truman Johnson and Nixon perceived the national interest when making their decisions to begin or extend U S war involvement He assesses the value of National Security Council participation in the decision making process and presents case study analyses of three imminent U S foreign policy concerns Quebec s possible separation from Canada the Panama Canal Treaty and the potential for race war in South Africa with an epilogue on the challenges facing Carter The author suggests that the most important U S national interest in the future will be economic with energy conservation a top priority

**Study of the Operation of the Panama Canal Company and Canal Zone Government ...** United States. Congress. House.

Merchant Marine and Fisheries, 1955 *Leadership and Negotiation in the European Union* Jonas Tallberg, 2006-08-24 In this 2006 book Jonas Tallberg offers a novel perspective on some of the most fundamental questions about international cooperation and European Union politics Offering the first systematic theoretical and empirical exploration of the influence wielded by chairmen of multilateral negotiations Tallberg develops a rationalist theory of formal leadership and demonstrates its explanatory power through carefully selected case studies of EU negotiations He shows that the rotating Presidency of the EU constitutes a power platform that grants governments unique opportunities to shape the outcomes of negotiations His provocative analysis establishes that Presidencies while performing vital functions for the EU simultaneously exploit their privileged political position to favour national interests Extending the scope of the analysis to international negotiations on trade security and the environment Tallberg further demonstrates that the influence of the EU Presidency is not an isolated occurrence but the expression of a general phenomenon in world politics the power of the chair

**International Institutions** Lisa L. Martin, Beth A. Simmons, 2001 A wide range of theoretical and empirical approaches to international institutions **Leadership in the Big Bangs of European Integration** D. Beach, C. Mazzucelli, 2006-11-28 This book

presents the first comprehensive analysis of the major treaty reforms over the past two decades to consider whether the path from the Single European Act in 1985 to the present Constitutional Treaty has been pushed by the Franco German tandem or has been the result of leadership provided the Commission or smaller member states **Political Leadership** Matthew Laing, 2020-11-27 Drawing upon a diverse range of traditions and contexts this authoritative new textbook presents a systematic introduction to political leadership Making extensive use of examples of real leaders from a variety of cultural backgrounds the book links theoretical ideas and concepts to real world political leadership and in doing so helps students to make sense of why different leaders lead as they do and why people choose to follow them This is ideal reading for students taking courses on political leadership and related topics **Domestic Politics, International Bargaining and China's Territorial Disputes** Chien-peng Chung, 2004-07-15 This is a groundbreaking analysis of China's territorial disputes exploring the successes and failures of negotiations that have taken place between its three neighbours namely India Japan and Russia By using Roberts Putnam's two level game framework Chung relates the outcome of these disputes to the actions of domestic nationalist groups who **The Politics of the Euro-Zone** Kenneth Dyson, 2000-09-28 The Euro Zone represents the single most important step in European Integration since 1957 and one of the boldest economic monetary and political projects in modern history In this first major study the author examines the major political questions raised by the birth of the Euro Zone on January 1 1999 and argues for a more politically informed analysis and assessment of its nature operation and prospects How does the Euro Zone operate What does it mean for European States and for the political strategies of governments How is its operation to be explained What are its prospects for stability What kinds of policies are needed to strengthen its capacity to withstand crisis The book stresses the ECB centric nature of the Euro Zone and its implications both for policy and politics in Europe and for theories of integration The ECB emerges as a powerful policy pusher and ideational leader with an authority and power exceeding that of the European Commission in the integration process Dyson examines the related problems of social justice democratic consent and identity He also argues that the Euro Zone represents a process of transition to the EU as a stabilization State An innovative aspect of the book is its application of a strength strain model for the purpose of analyzing and assessing the stability of the Euro Zone It concludes that the stability of the Euro Zone will be strongly conditioned by three factors how Kantian rather than Hobbesian or Lockean its political culture proves to be with a key reproducibility failing here on the quality of political leadership its possession of policy instruments to tackle liquidity as well as debt traps and the speed and efficiency of mechanisms of benchmarking policy transfer and lesson drawing **Free Zone Scientology** Aled Thomas, 2021-04-08 In this novel academic study Aled Thomas analyses modern issues surrounding boundaries and fluidity in contemporary Scientology By using the Scientologist practice of auditing as a case study this book explores the ways in which new types of Scientologies can emerge The notion of Free Zone Scientology is characterised by its horizontal structure in contrast to the vertical hierarchy of the institutional

Church of Scientology With this in mind Thomas explores the Free Zone as an example of a developing and fluid religion directly addressing questions concerning authority leadership and material objects This book by maintaining a double focus on the top down hierarchy of the Church of Scientology and the horizontal fluid nature of the Free Zone breaks away from previous research on new religions which have tended to focus either on new religions as indices of broad social processes such as secularization or globalization or as exemplars of exotic processes such as charismatic authority and brainwashing Instead Thomas adopts auditing as a method of providing an in depth case study of a new religion in transition and transformation in the 21st century This opens the study of contemporary and new religions to a series of new questions around hybrid religions sacred and secular and acts as a framework for the study of similar movements formed in recent decades
