The British National Bibliography Arthur James Wells,2003 **Peer-Led Team Learning: Evaluation, Dissemination, and Institutionalization of a College Level Initiative** Leo Gafney,Pratibha Varma-Nelson,2008-06-24

There seems to be no end to the flood of conferences workshops panel discussions reports and research studies calling for change in the introductory science courses in our colleges and universities But there comes a time to move from criticism to action In 1993 the Division of Undergraduate Education of the National Science Foundation called for proposals for systemic initiatives to change the way introductory chemistry is taught One of the five awards was to design develop and implement the peer led Workshop a new structure to help students learn science This book is a study of 15 years of work by the Peer Led Team Learning PLTL project a national consortium of faculty learning specialists and students The authors have been in the thick of the action as project evaluator Gafney and co principle investigator Varma Nelson Readers of this book will find a story of successful change in educational practice a story that continues today as new institutions faculty and disciplines adopt the PLTL model They will learn the model in theory and in practice and the supporting data that encourage others to adopt and adapt PLTL to new situations Although the project has long since lost count of the number of implementations of the model conservative estimates are that more than 100 community and four year colleges and a range of universities have adopted the PLTL model to advance student learning for more than 20 000 students in a variety of STEM disciplines **The Case Against Homework** Sara Bennett,Nancy Kalish,2006-08-29 Does assigning fifty math problems accomplish any more than assigning five Is memorizing word lists the best way to increase vocabulary especially when it takes away from reading time And what is the real purpose behind those devilish dioramas The time our children spend doing homework has skyrocketed in recent years Parents spend countless hours cajoling their kids to complete such assignments often without considering whether or not they serve any worthwhile purpose Even many teachers are in the dark Only one of the hundreds the authors interviewed and surveyed had ever taken a course specifically on homework during training The truth according to Sara Bennett and Nancy Kalish is that there is almost no evidence that homework helps elementary school students achieve academic success and little evidence that it helps older students Yet the nightly burden is taking a serious toll on America s families It robs children of the sleep play and exercise time they need for proper physical emotional and neurological development And it is a hidden cause of the childhood obesity epidemic creating a nation of homework potatoes In *The Case Against Homework* Bennett and Kalish draw on academic research interviews with educators parents and kids

and their own experience as parents and successful homework reformers to offer detailed advice to frustrated parents You'll find out which assignments advance learning and which are time wasters how to set priorities when your child comes home with an overstuffed backpack how to talk and write to teachers and school administrators in persuasive nonconfrontational ways and how to rally other parents to help restore balance in your children's lives Empowering practical and rigorously researched *The Case Against Homework* shows how too much work is having a negative effect on our children's achievement and development and gives us the tools and tactics we need to advocate for change Also available as an eBook
