Network Power Japan And Asia:

Network Power Peter J. Katzenstein, Takashi Shiraishi, 2018-09-05 This book examines regional dynamics in contemporary east and southeast Asia scrutinizing the effects of Japanese dominance on the politics economics and cultures of the area The contributors ask whether Japan has now attained through sheer economic power and its political and cultural consequences the predominance it once sought by overtly military means The discussion is framed by the profound changes of the past decade Since the end of the Cold War and the breakup of the Soviet Union regional dynamics increasingly shape international and national developments This volume places Japan s role in Asian regionalism in a broader comparative perspective with European regionalism and the role Germany plays It assesses the competitive logics of continental and coastal primacy in China In starkest form the question addressed is whether Chinese or Japanese domination of the Asian region is more likely Between a neo mercantilist emphasis on the world s movement toward relatively closed regional blocs and an opposing liberal view that global markets are creating convergent pressures across all national boundaries and regional divides this book takes a middle position Asian regionalism is identified by two intersecting developments Japanese economic penetration of Asian supplier networks through a system of production alliances and the emergence of a pan Pacific trading region that includes both Asia and North America The contributors emphasize factors that are creating an Asia marked by multiple centers of influence including China and the United States

economy theory to the realities of contemporary global finance Grimes places regional issues firmly in the wider context of great power rivalries He argues that financial regionalism can best be understood as one arena for competition among Japan the United States and China Despite their mutual desire for regional prosperity and economic stability these three powers have conflicting political interests Their struggles for regional leadership raise questions about the long term feasibility of regional financial cooperation the possible effects of Sino Japanese rivalry on regional financial stability and the potential for East Asian financial regionalism to undermine the long established albeit waning global and regional dominance of the United States and the dollar

Future of Factory Asia Choi Byung-il, Changyong Rhee, Korea Economic Research Institute (South Korea), 2014-06-26. This book assesses the challenges confronting the Factory Asia model. It examines how countries that are already part of Factory Asia can move up the value chain and how economies that currently stand outside the parameters of Factory Asia can find ways to join the global network production system. The book hinges on two tasks: first, how fast can Asia expand its own domestic and regional markets, and second, how fast can Asia upgrade its competitiveness in the manufacturing sector. As analyzed in great detail and depth in this book, small and big obstacles stand in the way of fulfilling these tasks. Without clever economic reasoning, shrewd strategy, and immense political entrepreneurship, the new Factory Asia will remain as an unfinished agenda. This book will serve as catalyst for officials, experts, and industries to facilitate a larger public dialogue in and out of Asia and help generate momentum for the transformation of Asia into a more inclusive and sustainable platform for the future of Factory Asia.

Contents: Tables and Figures, Contributors, Foreword, Executive Summary, Abbreviations, Part I: Beyond Factory Asia, 1. Beyond Factory Asia: Fuelling Growth in a Changing World, 2. Can Free Trade Agreements Support the Growth or Spread of Factory Asia, Part II: Outsourcing Risks of Asian Manufacturing and Services, 3. The Effect of International Outsourcing on Job Growth in the Republic of Korea, 4. Do Small and Medium Enterprises Gain from Global Production Networks? Evidence from the Republic of Korea, 5. Changing Competitiveness of the Japanese Manufacturing Sector and Firms in Regional Production Networks in Asia, 6. Services Sector Integration in Asia: Emerging Regional Service Business Models, Part III: Source of Germany's Competitiveness in Manufacturing, 7. The End of Diversity? Kozo Yamamura, Wolfgang Streeck, 2018-05-31. After the devastation of World War II, Germany and Japan built national capitalist institutions that were remarkably successful in terms of national reconstruction and international competitiveness. Yet both miracles have since faltered, allowing U.S. capital and its institutional forms to establish global dominance. National varieties of capitalism are now under intense pressure to converge.

to the U S model Kozo Yamamura and Wolfgang Streeck have gathered an international group of authors to examine the likelihood of convergence to determine whether the global forces of Anglo American capitalism will give rise to a single homogeneous capitalist system The chapters in this volume approach this question from five directions international integration technological innovation labor relations and production systems financial regimes and corporate governance and domestic politics In their introduction Yamamura and Streeck summarize the crises of performance and confidence that have beset German and Japanese capitalism and revived the question of competitive convergence The editors ask whether the two countries confronted with the political and economic exigencies of technological revolution and economic internationalization must abandon their distinctive institutions and the competitive advantages these have yielded in the past or whether they can adapt and retain such institutions thereby preserving the social cohesion and economic competitiveness of their societies
