Managing within Networks Robert Agranoff,2007-05-07 The real work of many governments is done not in stately

domed capitols but by a network of federal and state officials working with local governments and nongovernmental organizations to address issues that cross governmental boundaries Managing within Networks analyzes the structure operations and achievements of these public management networks that are trying to solve intractable problems at the field level It examines such areas as transportation economic and rural development communications systems and data management water conservation wastewater management watershed conservation and services for persons with developmental disabilities Robert Agranoff draws a number of innovative conclusions about what these networks do and how they do it from data compiled on fourteen public management networks in Indiana Iowa Kentucky Nebraska and Ohio Agranoff identifies four different types of networks based on their purposes and observes the differences between network management and traditional management structures and leadership He notes how knowledge is managed and value added within intergovernmental networks This volume is useful for students scholars and practitioners of public management

Impact Networks David Ehrlichman, 2021-10-12 The key to solving big complex problems a powerful and flexible organizing system that can span regions teams and silos of all kinds The social and environmental challenges we face today are not only complex they are also systemic and structural and have no obvious solutions They require diverse combinations of people organizations and sectors to coordinate actions and work together even when the way forward is unclear Even so collaborative efforts often fail because they attempt to navigate complexity with traditional strategic plans created by hierarchies that ignore the way people naturally connect By embracing a living systems approach to organizing impact networks bring people together to build relationships across boundaries leverage the existing work skills and motivations of the group and make progress amid unpredictable and ever changing conditions As a powerful and flexible organizing system that can span regions organizations and silos of all kinds impact networks underlie some of the most impressive and large scale efforts to create change across the globe David Ehrlichman draws on his experience as a network builder interviews with dozens of network leaders and insights from the fields of network science community building and systems thinking to provide a clear process for creating and developing impact networks Given the increasing complexity of our society and the issues we face our ability to form grow and work through networks has never been more essential Networks are the organizing system of the future and this book is your guide Philip Li President and CEO Robert Sterling Clark Foundation

Explanation-Based Neural Network Learning Sebastian Thrun, 2012-12-06 Lifelong learning addresses situations in which a learner faces a series of different learning tasks providing the opportunity for synergy among them Explanation based neural network learning EBNN is a machine learning algorithm that transfers knowledge across multiple learning tasks When faced with a new learning task EBNN exploits domain knowledge accumulated in previous learning tasks to guide generalization in the new one As a result EBNN generalizes more accurately from less data than comparable methods Explanation Based Neural Network Learning A Lifelong Learning Approach describes the basic EBNN paradigm and

investigates it in the context of supervised learning reinforcement learning robotics and chess The paradigm of lifelong learning using earlier learned knowledge to improve subsequent learning is a promising direction for a new generation of machine learning algorithms Given the need for more accurate learning methods it is difficult to imagine a future for machine learning that does not include this paradigm From the Foreword by Tom M Mitchell Ethnomusicology: A Contemporary Reader, Volume II Jennifer C. Post, 2017-09-20 Ethnomusicology A Contemporary Reader Volume II provides an overview of developments in the study of ethnomusicology in the twenty first century offering an introduction to contemporary issues relevant to the field Nineteen essays written by an international array of scholars highlight the relationship between current issues in the discipline and ethnomusicologists engagement with issues such as advocacy poverty and social participation maintaining intangible cultural heritages and ecological concerns It provides a forum for rethinking the discipline s identity in terms of major themes and issues to which ethnomusicologists have turned their attention since Volume I published in 2005 The collection of essays is organized into six sections Property and Rights Applied Practice Knowledge and Agency Community and Social Space Embodiment and Cognition Curating Sound Volume II serves as a basic introduction to the best writing in the field for students professors and music professionals perfect for both introductory and upper level courses in world music Together with the first volume Ethnomusicology A Contemporary Reader Volume II provides a comprehensive survey of current research directions Sociology in the Age of the Internet Allison Cavanagh, 2007-04-16 In recent years there has been a large and diverse body of writing from scholars in the social sciences who have been studying changes brought about by new communication technologies in general and the Internet in particular The question of how people behave interact and organize themselves in relation to this form of communication has been given added prominence by developments within new social theory especially in relation to the novelty of contemporary social formations and the importance of mass communications to this changed order For the student new to the study of technology and society there are a bewildering array of claims and counter claims representing a spectrum of theoretical methodological and critical sensibilities in relation to the Internet In this new book Allison Cavanagh evaluates the work in this area by Investigating the novelty of the Internet and setting the Internet in the context of communication histories Evaluating the extent and rate of change through a synthesis of the available empirical literature Providing a key to understanding the changes identified through an evaluation of the utility of new social theory Sociology in the Age of the Internet is essential reading for academics and students with an interest in the relationship between the internet and society
