Neural Networks and Fuzzy Systems Bart Kosko,1992 *Computational Intelligence: Soft Computing and Fuzzy-Neuro Integration with Applications* Okyay Kaynak, Lotfi A. Zadeh, Burhan Türksen, Imre J. Rudas, 2012-12-06 Soft computing is a consortium of computing methodologies that provide a foundation for the conception design and deployment of intelligent systems and aims to formalize the human ability to make rational decisions in an environment of uncertainty and imprecision This book is based on a NATO Advanced Study Institute held in 1996 on soft computing and its applications The distinguished contributors consider the principal constituents of soft computing namely fuzzy logic neurocomputing genetic computing and probabilistic reasoning the relations between them and their fusion in industrial applications Two areas emphasized in the book are how to achieve a synergistic combination of the main constituents of soft computing and how the combination can be used to achieve a high Machine Intelligence Quotient

Neural Networks G David Garson, 1998-09-24 This book provides the first accessible introduction to neural network analysis as a methodological strategy for social scientists The author details numerous studies and examples which illustrate the advantages of neural network analysis over other quantitative and modelling methods in widespread use Methods are presented in an accessible style for readers who do not have a background in computer science The book provides a history of neural network methods a substantial review of the literature detailed applications coverage of the most common alternative models and examples of two leading software packages for neural network analysis

Building Neural Networks David M. Skapura, 1996 Organized by application areas rather than by specific network architectures or learning algorithms Building Neural Networks shows why certain networks are more suitable than others for solving specific kinds of problems Skapura also reviews principles of neural information processing and furnishes an operations summary of the most popular neural network processing models

Neural Logic Networks: A New Class Of Neural Networks Hoon Heng Teh, 1995-10-25 This book is the first of a series of technical reports of a key research project of the Real World Computing Program supported by the MITI of Japan The main goal of the project is to model human intelligence by a special class of mathematical systems called neural logic networks The book consists of three parts Part 1 describes the general theory of neural logic networks and their potential applications Part 2 discusses a new logic called Neural Logic which attempts to emulate more closely the logical thinking process of human Part 3 studies the special features of neural logic networks which resemble the human intuition process This book should appeal to researchers in artificial intelligence neural computings and logic as well as graduate and advance undergraduate students in computer
