Imaging the Brain in Autism Manuel F. Casanova, Ayman S. El-Baz, Jasjit S. Suri, 2013-05-24 Data compiled by the Center for Disease Control and Prevention indicates an alarming and continuing increase in the prevalence of autism Despite intensive research during the last few decades autism remains a behavioral defined syndrome wherein diagnostic criteria lack in construct validity And contrary to other conditions like diabetes and hypertension there are no biomarkers for autism However new imaging methods are changing the way we think about autism bringing us closer to a falsifiable definition for the condition identifying affected individuals earlier in life and recognizing different subtypes of autism The imaging modalities discussed in this book emphasize the power of new technology to uncover important clues about the condition with the hope of developing effective interventions Imaging the Brain in Autism was created to examine autism from a unique perspective that would emphasize results from different imaging technologies These techniques show brain abnormalities in a significant percentage of patients abnormalities that translate into aberrant functioning and significant clinical symptomatology It is our hope that this newfound understanding will make the field work collaborative and provide a path that minimizes technical impediments

Neuroscience-Informed Counseling Thomas A. Field, Laura K. Jones, Lori A. Russell-Chapin, 2024-03-28 As professional counselors learn more about neuroscience they need guidance on how to integrate this new knowledge into counselor education and counseling practice with clients The purpose of this updated

edition is to provide a comprehensive resource for translating and applying neuroscientific concepts to the theory and practice of counseling. The authors provide guidance as to how counselors integrate neuroscience into their work with the hope of better understanding and identifying methods for effectively and responsibly incorporating key principles of neuroscience into the profession. This new edition incorporates the 2024 CACREP Standards as markers of learning to ensure that CACREP accredited programs have the information needed to apply neuroscientific concepts to all the major areas of counseling practice. This volume addresses the 2024 entry level educational standards of the main accrediting body of the counseling profession CACREP. Each of the eight common core areas of counseling knowledge and skills are covered: professional counseling orientation, social and cultural foundations, human growth and development, career development, helping relationships, group counseling and group work, testing and assessment, research and program evaluation. Several 2024 CACREP Standards that are integrated into the eight common core standards such as the impact of crises, disaster and traumatic events, the neurobiology of addictions, wellness and optimal performance, and psychopharmacology are also addressed. Some chapters also focus on doctoral level 2024 CACREP standards for counselor education and supervision. To purchase print copies, please visit the ACA Store. Reproduction requests for material from books published by ACA or any other questions about ACA Publications should be directed to publications@aca.org. ACA no longer provides complimentary print desk copies. Digital evaluation copies may be requested from Wiley by clicking the link above and completing the details about your institution and course.

**Psychosocial Interventions for Health and Well-Being**

Girishwar Misra, 2018-07-27. This volume provides multifaceted and multidisciplinary insights into the growing field of health studies. Providing inputs from the behavioural sciences as well as social sciences, it discusses the issues of recovery from illness and growth and wellbeing as situated in social and eco-cultural contexts and addresses the modalities of health-related interventions in diverse contexts. The specific themes taken up by the contributors are post-trauma, growth, resilience, gender and health, distress and wellness, indigenous healing, counselling and psychotherapy, disability-related interventions, self-healing as well as health issues of special groups like adolescents and the elderly, cancer patients and those suffering from other chronic illnesses. Till recently, the medical model has prevailed as the chief form of understanding health and illness. This has led to marginalization of the context, localization of all health and wellness components within the individual and to biological reductionism. The contributions to this volume propose corrective measures and provide diverse approaches in a balanced manner. This volume is useful for researchers and practitioners interested in health studies including the behavioural sciences, social work, medical anthropology and public health.
