Communication is one of life's most fundamental joys yet one often taken for granted until it is lost or fails to develop Yet for millions of children each year the skills that encompass communication stall or do not emerge at all Even a mild disorder or temporary interruption in development can have long term effects and results in serious and far reaching deficits that touch every aspect of a child's life Each year millions of children and their families join the ranks of those who are navigating a life they never expected and frequently feel they are unable to take on While it is critical to address the child's deficits with supports and specific interventions it is equally important to directly address the impact on the family from the marital relationship to the well being of siblings With a warm and compassionate approach Suzanne Ducharme provides parents with comprehensive information about speech and language development and the intervention process but also delves deeply into the fears concerns and questions that every parent faces when something goes wrong She provides families with information and resources but also support and perspective Using real stories throughout Ducharme is able to illustrate the range of difficulties challenges and triumphs of families who love and support children with speech and language issues
