Mothering Multiples Karen Kerkhoff Gromada, 1985 **Having Twins** Elizabeth Noble, 1980 **Twins**, 2000 *Handbook of Social Development* Vincent B. Van Hasselt, Michel Hersen, 1992-08-31 Social development over one's lifetime is a complex area that has received considerable attention in the psychological social psychological and sociological literature over the years Surprisingly however since 1969 when Rand McNally published Goslin's Handbook of Socialization no comprehensive statement of the field has appeared in book form Given the impressive data in this area that have been adduced over the last two decades we trust that our handbook will serve to fill that gap In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood adolescence adulthood and finally one's senior years In so doing we cover a variety of issues in depth The book contains 21 chapters and is divided into five parts I Theoretical Perspectives II Infants and Toddlers III Children and Adolescents IV Adults and V The Elderly Each of the parts begins with

introductory material that reviews the overall issues to be considered Many individuals have contributed to the final production of this handbook Foremost are our eminent contributors who graciously agreed to share with us their expertise We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project Finall we thank Eliot Werner Executive Editor at Plenum for his willingness to publish and for his tolerance for the delays inevitable in the development of a large handbook

Not All Twins Are Alike Barbara Klein,2003-02-28 Even twins are unique Most people idealize twins fantasizing a close perpetually loving relationship Yet Klein herself an identical twin demonstrates that twins have complicated and intense relationships that range from over identification or excessive closeness to profound estrangement and conflict Most twins who are raised as individuals deal with the significant emotional pain of separation in adolescence or young adulthood yet as mature adults can come to love and respect each other as individuals As Klein makes clear the parenting that twins receive as infants and young children affects the relationships that they have with one another and with the world they choose to function in Because parenting is a critical determinant of psychological well being it should be treated as a serious but manageable challenge This book is a must read for twins their parents and scholars students and other researchers and professionals dealing with mental health and child development
