 based on either views or down loads as a pdf There is some agreement between the two lists What is compelling is that of the

 focused on turkeys It is perhaps not unexpected that research on chickens dominates the top papers because of the following
 Chickens are commercially important being the number one meat animal globally Chickens are used as the model species for
 birds Other possibilities that could be the case include the following There are more researchers working on chickens
 compared to other commercial or wild species There are other avenues to publish wild bird research Lack of funding for open
 access article processing charges The exceptions to the chicken papers reviews is a paper on a passerine bird the migratory
 blackheaded bunting *Emberiza melanocephala* Singh et al 2018 and a review paper focused on turkey satellite cell
 proliferation and differentiation Velleman and Song 2017 Of the top papers reviews six were related to muscle physiology
