**Engage** Kjell Fenn, 2018-12-11 The most pressing issue in schools is classroom management specifically how to motivate students to do the work well Many teachers need strategies to help them and they also need the theory and research behind the strategies Why do the strategies work and why do they sometimes not work This book has 5 sections that are the different theoretical foundations for 18 different keys to student motivation At the beginning of each section the theory is explained briefly It is important that the readers understand the reason why a key or strategy works In this understanding a teacher can modify and accommodate the key or strategy to fit his/her particular students and context There are 18 chapters Each chapter is a key or applicable concept to student motivation that has been garnered from a theory or seminal work This explanation is followed by a vignette of a teacher's experience called In The Classroom and is followed by multiple strategies

**Reconstructing Lives** Nanthalia W. McJamerson, Ph. D., 2016-02-11 This author is onto something groundbreaking by combining literature counseling education and critical thinking Dr Jean Kerney Educational Consultant Chillicothe Ohio The

students and I experienced shocking revelations as they researched their selected celebrities As an Instructor I saw students were excited about learning that each celebrity they chose had a story which inspired drive to reach their glory Students had taken it at face value that these people s lives were always perfect Secondly I think this curriculum project gave students much needed advice Advice impacts differently when it comes from someone you idolize It gave these freshmen ideas of how to handle college and how to navigate issues in their lives Most importantly this project allowed students to exhale they now know whatever their struggles they are not alone Dr Jessie Broussard Researcher and Instructor University of Louisiana Lafayette When I was introduced to the Reconstructing Lives Project I was delighted to have a new way to assess my students comprehension of teaching theories Teacher candidates thought the theories were boring however they eventually found that connecting theories to their icons and later to themselves was meaningful The majority of my students felt the redemption that it brought them They didn t write it all in their papers rather they came to my office and explained what the project meant to them personally What surprised me most in 10 years of using the Project was the fact that it was not only a measure of student learning but also a measure of how much I could teach them about theory about my life and about their own life success Dr Felicie Barnes Professor of Education Retired Grambling State University Companion Workbook available at [www.amazon.com](http://www.amazon.com) RE MAKE AN ICON SO YOU CAN PRODUCE ONE
