Health Sector Performance Hossein Jalilian, 2003-08-01 There is growing international evidence that the effectiveness of health services stems primarily from the extent to which the incentives facing providers and consumers are aligned with e better health objectives Efficiency in health service provision requires that providers and consumers have incentives to use

healthcare resources in ways that generate the maximum health gains Equity in at least one sense requires that consumers requiring the same care are treated equally irrespective of their ability to pay Efficiency in the use of health services requires that consumers are knowledgeable about the services on offer and which are most appropriate to their needs Although these principles are enshrined in the design of every health system in the world they have proven extremely difficult to apply in practice Healthcare providers have financial obligations to their families as well as professional obligations to their patients Health service consumers generally lack information about both their health and health services so that they under consume or over consume healthcare The papers in this volume are selected from an international conference organized by the CDRI Cambodia that tried to deal with some of these issues With participation of international and local experts it aimed at collecting major experiences and innovative solutions from inside and outside the country to improve health sector performance with particular focus on institutions motivations and incentives

Occupying Habits Daniel Mann,2022-02-24 How did the Israeli military learn to cope with the ubiquity of media technologies that routinely document their power abuses Why did they re appropriate these to tighten their grip on Palestinian civilians This book explains why a high tech nation with advanced military technologies came to rely on the everyday media habits performed by soldiers and civilians Daniel Mann argues that the intensification of the security regime in Palestine and the increasingly personal use of media technologies by both soldiers and civilians are deeply entangled The book traces how beginning in the 1990s the integration of media into the lives of civilians and Israeli soldiers enabled Israel to transfer responsibilities to individual users who in turn became legally and ethically liable for state abuses of power Drawing on declassified documents found footage and social media Mann shows how both media and warfare have been remodelled around the figure of the defensive isolated and insular individual Mann suggests that the focus on representations and their close visual analysis paradoxically hinders our ability to understand media Instead of zooming into fine details we must step back to reveal the assemblage of images users and infrastructure that together serve to maintain the racial legal and aesthetic divide between Israel and Palestine *UIST 2006* ,2006 **Billboard** ,1961-08-28 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music
