BACKGROUND INFORMATION The last decades of the twentieth century saw huge changes in construction in the UK particularly in procurement methods and contract strategy In this book the author describes these changes as a construction reformation and suggests that the advent of the NEC played an important part in promoting those changes Since its introduction to the construction sector in 1991 the NEC has been highly recommended in the Latham Report and more recently by the Office of Government Commerce and is now widely used on many small and large projects in the UK and worldwide

Finally, it identifies areas of commonality of practice with other functions found within project-oriented organisations, plus sources of potential conflict and misunderstanding.

Part 2: Elements of Commercial Theory and Practice covers commercial leadership, exploring strategy, risk and uncertainty, management, financial decision making, and key legal issues.

Part 3: Approaches to Commercial Practice addresses best practice management and commercial and contracting strategies and tactics.

Part 4: Case Studies offers two extended case studies: Football Stadiums (the Millennium Stadium, Cardiff; the Emirates Stadium, Islington; and Wembley Stadium, London) and Heathrow Terminal 5. The book provides a one-stop shop to the many topics that underpin commercial management practice from both a demand-buy side and a supply-sell side perspective. It will help develop an understanding of the issues influencing commercial management, leadership, strategy, risk, financial, legal, best practice management, and commercial and contracting strategy and tactics.
