Nederland In De Bronstijd:

Bronze Age Settlements in the Low Countries Harry Fokkens, 2008-06-04 The Low Countries around the deltas of the river Rhine Meuse and Scheldt have a long tradition in large scale archaeological research This book brings together research from thirteen of the largest Bronze Age settlements described by their original excavators These contributions are preceded by two introductory chapters written by the editors providing a full overview of the state of Dutch Bronze Age settlement research the key sites and the explanatory models current within it Standards have been developed for the analysis of Bronze Age house plans and settlement sites and new models for the reading of the settled landscape The rich data of the Low Countries also incorporate burial areas and deposition places The findings presented can be seen to reflect the situation over a large area of lands bordering the North Sea Nederland in de bronstijd J. J. Butler, 1970 *Bronze Age Metalworking in the Netherlands (c. 2000-800 BC)* M. H. G. Kuijpers, 2008 Almost fifty years ago J J Butler started his research to trace the possible remains of a Bronze Age metalworker s workshop in the Netherlands Yet while metalworking has been deduced on the ground of the existence of regional types of axes and some scarce finds related to metalworking the smith s workplace has remained elusive In this Research Master Thesis I have tried to tackle this problem I have considered both the social as well as the technological aspects of metalworking to be able to determine conclusively whether metalworking took place in the Netherlands or not The first part of the thesis revolves around the social position of the smith and the social organization of metalworking My approach entails a re evaluation of the current theories on metalworking which I believe to be unfounded and one sided They tend to disregard production of everyday objects of which the most prominent example is the axe The second part deals with the technological aspects of metalworking and how these processes are manifested in the archaeological record Based on evidence from archaeological sites elsewhere in Europe and with the aid of experimental archaeology a metalworking toolkit is constructed Finally a method is presented which might help archaeologists recognize the workplace of a Bronze Age smith **Palaeohistoria 39,40 (1997-1998)** University of Groningen, Netherlands The Biological-Archaeological Institute, 2000-01-01 This annual covers excavation reports and analytical studies on archaeology palaeobotany and archaeozoology Topics covered include the Allerod vegetation of southeastern Friesland Bronze Age metal and amber in the Netherlands the origins of plums and much more

Midden-bronstijdsamenlevingen in het zuiden van de Lage Landen Liesbeth Theunissen, 2009 This thesis reviews and re assesses the Hilversum Culture of the southern Netherlands and Flanders in the second millennium BC Completed ten years ago but re issued with a new introduction by the author Text in Dutch In deze studie staan de overblijfselen van prehistorische boerengemeenschappen van omstreeks 3500 jaar geleden centraal Het gaat om samenlevingen die de pleistocene zandgronden van Zuid Nederland en Vlaanderen in de periode van 1800 tot 1050 voor Chr bewoonden Van hun boerenbestaan van toen rest niet veel maar het databestand aan archeologische ontdekkingen uit deze periode groeit sinds

jaar en dag Het was de archeoloog Willem Glasbergen die in de jaren vijftig de overblijfselen toeschreef aan de zogenoemde Hilversum cultuur Hij deed dit op grond van een aantal nieuwe elementen in de materiële restanten In eerste instantie was zijn definitie hoofdzakelijk gebaseerd op bepaalde typen grafmonumenten en de urnvondsten daaruit Nederzettingen waren lange tijd schaars Dat veranderde halverwege de jaren zestig toen het onderzoek bij de plaatsen Zijderveld en Dodewaard ronde huizen opleverde die duidelijk afweken van de langgerekte drieschepige woon stalboerderijen in Noord Nederland Glasbergen zag daarin een bevestiging van zijn hypothese de ongewone verschijnselen waren ontstaan door een migratie van een Zuid Engels volk naar het zuiden van de Lage Landen Veertig jaar na de definitie van de Hilversum cultuur is het archeologische databestand opnieuw tegen het licht gehouden Reden daarvoor was het toegenomen gegevensbestand en het veranderde paradigma De groeiende kritiek op de migratietheorie als verklaringsmodel had de Britse migranten uit het denken doen verdwijnen De tijd was rijp voor een evaluatie van het begrip Hilversum cultuur Met in de ene hand de restanten van het grafritueel de grafmonumenten en de begravingen en in de andere hand de overblijfselen van hun boerenerven schetst deze studie een beeld van de boerensamenlevingen van 3500 jaar geleden Daarnaast gaat de auteur uitgebreid in op het ontstaan en ontwikkeling van het archeologisch cultuurbegrip en dat van de Hilversum cultuur Uit de studie is duidelijk geworden dat bepaalde kenmerkende restanten vooral zichtbaar in het grafritueel nog steeds archeologische realiteiten zijn De vondstcomplexen die Glasbergen destijds als bouwstenen voor zijn definitie van de Hilversum cultuur hanteerde blijken nog steeds afwijkend te zijn zowel in de tijd het gaat om nieuwe verschijnselen als ruimtelijk ze kennen een beperkt verspreidingsgebied Alleen de ronde huizen zijn archeologisch onbewijsbaar De evaluatie geeft aan dat de Hilversum cultuur nog steeds als een archeologische cultuur aanwijsbaar is Ondanks de eigen karakteristieken maken de samenlevingen achter de Hilversum cultuur onderdeel uit van de uitgestrekte Noordwest Europese bronsijdtraditie gekenmerkt door lange woon stalhuizen grafheuvelbegravingen en grootschalige netwerkrelaties over lange afstanden Dit proefschrift is tien jaar na de verdediging opnieuw uitgebracht door Uitgeverij Sidestone en voorzien van een woord vooraf

Appendices to Stijn Arnoldussen, 2008 This publication contains the six main appendices to the PhD thesis A Living Landscape Bronze Age settlement sites in the Dutch river area c 2000 800 BC by Stijn Arnoldussen which was published by Sidestone Press in 2008 That study comprises an analysis of the nature i e the constituent components and dynamics i e diachronic approaches to settlement dynamics of the settlement sites It aims to integrate and synthesize interpretations of Bronze Age settlements based on a number of large scale excavations The discussion of the archaeological and geological research on these sites as well as more detailed source criticism and long term overviews of the occupation histories of six c 30 km² macro regions around them could for sake of conciseness not be incorporated into the main study's text However such discussions contain critical information necessary to interpret the results and to evaluate their representativeness and this information is now made available in this separate publication While these texts are

primarily appendices to the thesis they can be read separately by those who are particularly interested in the excavations at Zijderveld Rumpt Eigenblok Wijk bij Duurstede Meteren De Bogen Lienden Kesteren or Dodewaard which have been published in Dutch In addition the appendices provide a recent overview of the palaeogeographical development and occupation history of six large macro regions in the Dutch river area This information may be of relevance to those studying other sites within these macro regions for the period under study c 2000 800 BC Stijn Arnoldussen studied the prehistory of northwestern Europe at Leiden University and won the W A van Es award for the best Dutch archaeological MA thesis From 2003 to 2007 he was involved in a research project that focused on the Bronze Age cultural landscape in the Dutch river area The present book is a result of this project Stijn Arnoldussen is also co editor of the book *Bronze Age settlements in the Low Countries* Oxbow Books 2008 He is presently employed as a senior researcher with the Dutch National Service for Archaeology Cultural Landscape and Built Heritage RACM and starting November 2008 he will be employed as a lecturer in later prehistory at the University of Groningen

A Living Landscape Stijn Arnoldussen, 2008 Today half the Netherlands is below sea level Because of this water management is of key importance when it comes to maintaining present day habitation of the Dutch low lands In prehistory however large parts of the Dutch landscape were highly dynamic due to ongoing fluvial sedimentation Vast deltaic areas with ceaseless river activity formed the backdrop against which prehistoric occupation took place Although such landscapes may seem inhospitable the often excellently preserved archaeological evidence indicates that people lived in these lowlands throughout prehistory This book describes why Bronze Age farmers were keen to settle here and how these prehistoric communities structured the landscape around their house sites at various scales Using a vast body of evidence from several large scale excavations in the Dutch river area the author reconstructs the changes in the cultural landscape over time Starting from the Middle Neolithic changing preferences for settlement site locations and changes in domestic architecture are traced in detail to the Iron Age However for proper understanding of the cultural landscape not only settlements but also graves and patterns of object deposition and their landscape characteristics are discussed By using evidence from over 50 major excavations yielding over 300 house plans this book contains by far the richest data set on Dutch Bronze Age settlements Most of these results have not previously been published in English making this book of over 500 pages a true academic treasure for an international audience The in depth presentation of Bronze Age settlement sites as well as the critical discussion of models and premises current in later prehistoric settlement archaeology have an important relevance stretching beyond the Dutch lowland areas on which it is based The wealth of high quality Dutch data is presented as a synthesized yet well annotated narrative that rises above mere site interpretation even more so due to its landscape scale focus Therefore this book is a must have for those interested in later prehistoric cultural landscapes and settlement archaeology
