This book examines the regulation of pharmacists in the Netherlands and Belgium from the perspective of law and economics
It starts with an extensive and accessible overview of the economic literature with respect to the regulation including
selfregulation of liberal professions Subsequently this book analyses the extent to which the current regulation of Dutch and
Belgian pharmacists serves the public interest and the extent to which this regulation is a result of rent seeking behaviour by
private interest groups The author concludes that some regulation notably with respect to advertising design of the
pharmacy establishment of pharmacies and drug prices does not seem to serve the public interest Moreover he criticises the
regulation of reimbursement for the pharmacist which in both countries is still linked to the pharmacist s monopoly in the
distribution of drugs despite new tasks of the pharmacist in the field of pharmaceutical care In addition to a theoretical
analysis the author carries out an empirical research of rent seeking behaviour in the pharmaceutical market Although the
book studies the situation in the Netherlands and in Belgium its conclusions will certainly apply to other countries and other
professions The book will therefore be of interest to all economists lawyers and practitioners interested in regulation of the
liberal professions as well as practitioners and academics working in the field of health care **Authors and Subjects**
