Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimization of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model

also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies

Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

Removing the Stalin Stain William Briggs, 2020-10-30 Briggs tackles head on the zone of conflict that Marx never quite got to though not for lack of ambition How do nation states both manage and contest the military industrial surges of global capitalism Arguing the novel thesis that Stalin did good work for capitalism offering its defenders an open goal to score against Marxism Removing the Stalin Stain presents a clearly argued and outward facing Marxist analysis of contemporary politics Terrell Carver Professor of Political Theory University of Bristol UK Can Marxism emerge from the long shadow cast by Stalinism and challenge capitalism There is undoubtedly a growing interest in Marxism and socialism Opinion polls show a majority that regard socialism as a real option It is against this reality and as a contribution to growing debates that this book has been written Marxism as an ideological force and instituted to lead the charge against capitalism has been poorly served in the past century Many of its core messages have been obscured William Briggs gives a rousing defence of Marxism calling for a return of the working class to the centre of potential struggle Briggs seeks to heal the damage done to Marxism in the name of Marxism over generations past

Deconstructing the Welfare State Paula Hyde, Edward Granter, John Hassard, Leo McCann, 2016-06-23 Who are NHS middle managers What do they do and why and how do they do it This book explores the daily realities of working life for middle managers in the UK s National Health Service during a time of radical change and disruption to the entire edifice of publicly funded healthcare It is

an empirical critique of the movement towards a healthcare model based around HMO type providers such as Kaiser Permanente and United Health. Although this model is well known internationally, many believe it to be financially and ethically questionable and often far from best practice when it comes to patient care. Drawing on immersive ethnographic research based on four case studies: an Acute Hospital Trust, an Ambulance Trust, a Mental Health Trust, and a Primary Care Trust, this book provides an in-depth critical appraisal of the everyday experiences of a range of managers working in the NHS. It describes exactly what NHS managers do and explains how their roles are changing and the types of challenges they face. The analysis explains how many NHS junior and middle managers are themselves clinicians to some extent with hybrid roles as simultaneously nurse and manager, midwife and manager, or paramedic and manager. While commonly working in back office functions, NHS middle managers are also just as likely to be working very close to or actually on the front lines of patient care. Despite the problems they regularly face from organizational restructuring, cost control, and demands for accountability, the authors demonstrate that NHS managers in their various guises play critical yet undervalued institutional roles. Depicting the darker sides of organizational change, this text is a sociological exploration of the daily struggle for work dignity of a complex, widely denigrated and largely misunderstood group of public servants trying to do their best under extremely trying circumstances. It is essential reading for academics, students, and practitioners interested in health management and policy, organisational change, public sector management, and the NHS more broadly.

Crime, Harm and Consumerism Steve Hall, Tereza Kuldova, Mark Horsley, 2020-01-08. This book offers a collection of cutting edge essays on the relationship between crime, harm, and consumer culture. Although consumer culture has been addressed across the social sciences, it has yet to be fully explored in criminology. The editors bring together an impressive list of authors with original ideas and a fresh perspective to this field. The collection first introduces the reader to three sets of ideas which will be especially useful to students and researchers piecing together theoretical frameworks for their studies. New concepts such as pseudo pacification, the materialist libertine, and the commodification of abstinence can be used as foundation stones for new explanatory criminological analyses in the 21st century. The collection then moves on to present case studies based on rigorous empirical work in the fields of consumption and debt, outlaw gangs, illegal drug markets, gambling, the mentality that drives investment fraudsters, and the relationship between social media and state surveillance. These case studies showcase the strength of the research skills and knowledge these scholars offer to the field of criminology. Written in a clear and direct style, this book will appeal to students and scholars in criminology, sociology, cultural studies, social theory, and those interested in learning about the effects of consumer culture in modern society.

The Myth of the Crime Decline seeks to critically interrogate the supposed statistical decline of crime rates thought to have occurred in a number of predominantly Western countries over the past two decades Whilst this trend of declining crime rates seems profound serious questions need to be asked Data sources need to be critically interrogated and context needs to be provided This book seeks to do just that This book examines the wider socio economic and politico cultural context within which this decline in crime is said to have occurred highlighting the changing nature and landscape of crime and its ever deepening resistance to precise measurement By drawing upon original qualitative research and cutting edge criminological theory this book offers an alternative view of the reality of crime and harm In doing so it seeks to reframe the crime decline discourse and provide a more accurate account of this puzzling contemporary phenomenon Additionally utilising a new theoretical framework developed by the author this book begins to explain why the crime decline discourse has been so readily accepted Written in an accessible yet theoretical and informed manner this book is a must read for academics and students in the fields of criminology sociology social policy and the philosophy of social sciences
