Negotiating Nationalism Nation Building Federalism And Secession In The Multinational State:

Negotiating Nationalism Wayne Norman, 2006-05-25 There are at least three times as many nations as states in the world today This book addresses some of the special challenges that arise when two or more national communities re the same multinational state As a work in normative political philosophy its principal aim is to evaluate the political and institutional choices of citizens and governments in states with rival nationalist discourses and nation building projects The first chapter takes stock of a decade of intense philosophical and sociological debates about the nature of nations and nationalism Norman identifies points of consensus in these debates as well as issues that do not have to be definitively resolved in order to proceed with normative theorizing He recommends thinking of nationalism as a form of discourse a way of arguing and mobilizing support and not primarily as a belief in a principle A liberal nationalist then is someone who uses nationalist arguments or appeals to nationalist sentiments in order to rally support for liberal policies The rest of the book is taken up with the three big political and institutional choices in multinational states First what can political actors and governments legitimately do to shape citizens national identity or identities This is the core question in the ethics of nation building or what Norman calls national engineering Second how can minority and majority national communities each be given an adequate degree of self determination including equal rights to carry out nation building projects within a democratic federal state Finally even in a world where most national minorities cannot have their own state how should the constitutions of multinational federations regulate secessionist politics within the rule of law and the ideals of democracy More than a decade after Yael Tamir s ground breaking *Liberal Nationalism* Norman finds that these three great practical and institutional questions have still rarely been addressed within a comprehensive normative theory of nationalism

Negotiating Nationalism Wayne J. Norman, 2006 *Constitutional Law and Politics of Secession* Antoni Abat i Ninet, 2023-07-31 This collection presents an analysis of the concept of secession and its constitutional accommodation alongside an assessment of the effects of secession in constitutional and international law The work proposes a new approach and insights into the existing literature that fill a gap from multidisciplinary and transdisciplinary perspectives The book approaches the topics of secession constitutionalism and their relationship from both theoretical and empirical perspectives including the analysis of particular secessionist examples such as Catalonia the Basque Country Tigray the Palestinian minority in Israel Bosnia and Herzegovina and the Mapuche Nation from a comparative constitutional perspective Elucidating these issues from different methodological and conceptual perspectives produces novelties in the scientific and constitutional debate The interplay between constitutions constitutional law and secession is indeed explored from philosophical socio legal but also from strict constitutional law outlooks Written by constitutional and public international law experts the book will be of interest to students academics and researchers working in the areas of constitutional law legal theory theory of the state philosophy of law and political science *Constitutionalizing Secession in Federalized States*

Miodrag A. Jovanović, 2007 This book is a thorough and professional study about secession Starting from the perspective of contemporary political philosophy the book explores the relevance of this issue for the theory and practice of federalism as well as its status under current public international law and concludes with a comparative constitutional analysis of the subject matter In the final chapter it provides a constitutionalized procedure of secession based on fundamental liberal democratic values The book argues that a liberal democratic response to the secession controversy might consist of the constitutionalization of a right to secession While a number of recent works in political theory point to the fact that under certain circumstances the moral right of a group to secession should be recognized only a few of them are ready to defend the institutionalization of that right through the instruments of constitutional law This topical and thought provoking book is a welcome contribution to the ongoing debate on secession and will be of interest to academics in a variety of disciplines such as law history politics international relations philosophy and applied ethics and to politicians and constitution drafters

Post-Genocide Rwanda Timothy Longman, 2017-07-13 A critical exploration of the steps taken to promote peace reconciliation and justice in post genocide Rwanda [Changing Borders in Europe](#) Jacint Jordana, Michael Keating, Axel Marx, Jan

Wouters, 2018-12-21 *Changing Borders in Europe* focuses on the territorial dimension of the European Union It examines the transformation of state sovereignty within the EU the emergence of varied self determination claims and the existence of a tailor made architecture of functional borders established by multiple agreements This book helps to understand how self determination pressures within the EU are creating growing concerns about member states identity redefining multi level government in the European space It addresses several questions regarding two transformative processes blurring of EU borders and state sovereignty shifts and their interrelations from different disciplinary perspectives such as political science law political economy and sociology In addition it explores how the variable geographies of European borders may affect the issue of national self determination in Europe opening spaces for potential accommodations that could be compatible with existing states and legal frameworks This book will be of key interest for scholars students and practitioners of EU politics public administration political theory federalism and more broadly of European studies international law ethnic studies

political economy and the wider social sciences **National Accountability for International Crimes in Africa** Emma Charlene Lubaale, Ntombizozo Dyani-Mhango, 2022-02-07 This book critically examines the issues pertaining to the Rome Statute's complementarity principle. The focus lies on the primacy of African states to prosecute alleged perpetrators of international crimes in their respective jurisdictions. The chapters explore states' international and domestic obligations to hold perpetrators of international crimes to account before the national courts and demonstrate the complexity of enforcing national accountability of alleged perpetrators of international crimes while also ensuring that post-conflict African states achieve national healing, reconciliation, and sustainable peace. The contributions reject impunity for international crimes whilst also considering these complexities. Emphasis further lies on the meaning of accountability in the context of the politics of selective international criminal justice for crimes committed before the establishment of the International Criminal Court.

The Last Post-Cold War Socialist Federation Semahagn Gashu Abebe, 2016-03-03 After the fall of the Berlin wall and the disintegration of the former USSR and Yugoslavia, it has widely been assumed that socialist federations have become a thing of the past. Ethiopia's ethnic federal system, however, is essentially a socialist federal system based on the notion of the right to self-determination of nationalities and a Marxist-Leninist organization of the state and party. This book assesses the Ethiopian ethnic federal system from the perspective of the principles of socialist federations and other Marxist-oriented policies pursued by the ruling Ethiopian Peoples Revolutionary Democratic Front (EPRDF). Exploring how the application of these ideological principles has impacted on the structure and function of the Ethiopian federal system, the research examines the ways in which these ideological policies of the ruling party affect national consensus, protection of human rights, the rights of minority groups, separation of power, principles, and the relationship between the federal and regional governments. It also explores the extent to which ideological principles have had an impact on the democratization process, rule of law, and in building up institutions such as parliamentary democracy, the judiciary, the media, and civil society organizations in the country. Approaching the Ethiopian federal system from the perspective of the fundamental ideological principles of the party in

power allows a deeper insight into the structure and function of the ethnic federal system Constitutive Justice William A. Barbieri, 2015-09-15 Both classical and modern accounts of justice largely overlook the question of how the communities within which justice applies are constituted in the first place This book addresses that problem arguing that we need to accord a place to the theory of constitutive justice alongside traditional categories of distributive and commutative justice

European Constitutional Language András Jakab, 2016-04-15 Provides a systematic analysis of both the historical development and current interpretation of constitutional law discourse in Europe **Deconstructing Self-Determination in International Law** Przemysław Tacik, 2023-07-17 The right of peoples to self determination seems well settled and covered extensively in the scholarly record Yet old Trotsky's question of whom is this right and to what haunts the self determination literature Somehow almost every work on it begins with an expression of puzzlement This right turns out to be elusive underdefined in its scope and content paradoxical in almost every aspect This book mobilises all powers of critical legal theory and modern philosophy to take the bull by its horns Instead of ironing out the paradoxes it aims to finally give them a proper explanation based on the concept of exception *European Regions* Elisabeth Donat, Sarah Meyer, Gabriele Abels, 2020-09-23 At the beginning of the 21st century the EU is facing deep political social and economic changes The benefit of supranational organization is no longer obvious to European citizens and questions of legitimacy have accompanied the EU's development over the last decades Regions albeit often deemed obsolete present themselves as stable and reliable partners in this turbulent environment in being important objects of identification to their citizens but also relevant political and legal entities in the EU's multilevel governance system This edited volume asks about the role of regions and regional identity in a European Union that is perhaps struggling more than ever about its future *The Undivided Past* David Cannadine, 2013-03-19 An impassioned controversial plea for us to recognise the importance of writing history from world famous historian David Cannadine David Cannadine is one of Britain's most distinguished historians and this is his masterpiece The Undivided Past is an agonised attempt to understand how so much of the writing of history has been driven by a fatal desire to dramatize differences to create an us versus them Great works of history have so often had at their heart a wish to sift people in ways that have been profoundly damaging and provided the intellectual backing and justification for terrible political decisions Again and again categories have been found whether religion nation class gender race or civilization that have sought to explain world events by fabricating some malevolent or helpless other This book is above all an appeal to common humanity We seem doomed always to fall most recently in the wake of 9 11 into the us versus them trap but there is no reason why the history we read and write should not be much better than this and describe what we all have in common rather than what divides us About the author Sir David Cannadine is Chair of the National Portrait Gallery Dodge Professor of History at Princeton University and General Editor of the Penguin History of Europe and Penguin History of Britain He is a Fellow of the British Academy and the Chair of the Blue Plaques Committee His major books include The

Rise and Fall of the British Aristocracy Ornamentalism and Mellon A Life He is currently writing the Penguin History of Victorian Britain He has previously taught at Cambridge Columbia and London universities

Minority Accommodation through Territorial and Non-Territorial Autonomy Tove H. Malloy, Francesco Palermo, 2015-10-08 Minority Accommodation through Territorial and Non Territorial Autonomy explores the relationship between minority territory and autonomy and how it informs our understanding of non territorial autonomy NTA as a strategy for accommodating ethno cultural diversity in modern societies While territorial autonomy TA is defined by a claim to a certain territory NTA does not assume that it is derived from any particular right to territory allocated to groups that are dispersed among the majority while belonging to a certain self identified notion of group identity In seeking to understand the value of NTA as a public policy tool for social cohesion this volume critically dissects the autonomy arrangements of both NTA and TA and through a conceptual analysis and case study examination of the two models rethinks the viability of autonomy arrangements as institutions of diversity management This is the second volume in a five part series exploring the protection and representation of minorities through non territorial means examining this paradox within law and international relations with specific attention to non territorial autonomy NTA

Zapata-Barrero, 2014-07-08 This book develops an exploratory theory of immigration in multilevel states addressing two themes governance and political parties It examines not only how and by whom immigration policy is decided and implemented at different levels but also how it has become a key issue of party competition across multilevel states

Multicultural Odysseys Will Kymlicka, 2009-02-05 We are currently witnessing the global diffusion of multiculturalism both as a political discourse and as a set of international legal norms States today are under increasing international scrutiny regarding their treatment of ethnocultural groups and are expected to meet evolving international standards regarding the rights of indigenous peoples national minorities and immigrants This phenomenon represents a veritable revolution in international relations yet has received little public or scholarly attention In this book Kymlicka examines the factors underlying this change and the challenges it raises Against those critics who argue that multiculturalism is a threat to

universal human rights Kymlicka shows that the sort of multiculturalism that is being globalized is inspired and constrained by the human rights revolution and embedded in a framework of liberal democratic values However the formulation and implementation of these international norms has generated a number of dilemmas The policies adopted by international organizations to deal with ethnic diversity are driven by conflicting impulses Pessimism about the destabilizing consequences of ethnic politics alternates with optimism about the prospects for a peaceful and democratic form of multicultural politics The result is often an unstable mix of paralyzing fear and naive hope rooted in conflicting imperatives of security and justice Moreover given the enormous differences in the characteristics of minorities eg their size territorial concentration cultural markers historic relationship to the state it is difficult to formulate standards that apply to all groups Yet attempts to formulate more targeted norms that apply only to specific categories of minorities eg indigenous peoples or national minorities have proven controversial and unstable Kymlicka examines these dilemmas as they have played out in both the theory and practice of international minority rights protection including recent developments regarding the rights of national minorities in Europe the rights of indigenous peoples in the Americas as well as emerging debates on multiculturalism in Asia and Africa
