*Ethnographic Choices* Christopher Bollinger,Denise Menchaca,Phil Ruge-Jones,Angela Schnelle,Rebecca Acy,Taylor

Choate, Kate Miller, 2014-11-21 *Ethnographic Choices* is the outcome of a collaborative effort among teachers and students. Our goal was to develop a primer teaching ethnography that resists oversimplifying complex human dynamics but remains accessible to undergraduate students. This book focuses on what a person new to the field needs to know in order to deeply engage the method. We have chosen to provide specific examples with more detail excavating the complexity of data collection, analysis, and representation. We have also chosen to focus more on critical cultural approaches attending to race, gender, and class. Conversely, we have sacrificed some attention to history and breadth of the field. While this too is important, we believe the value of ethnography is best learned through doing the method and doing so with attention to the complexity of the method.

*Dispatches from the Field* Andrew Gardner, David M. Hoffman, 2006-04-17 Penned by advanced graduate students amidst their dissertation fieldwork, these provocative essays capture the challenges and intricacies of that anthropological rite of passage. The collections' authors frankly portray the mistakes they made in the field, their struggle to analyze the events unfolding before their eyes, the psychological and emotional frustration seemingly endemic to doing ethnography, and the ethical complexities of researching living people. The authors present these essays not as models of ideal fieldwork or as a series of lessons about how to overcome potential hurdles one faces in the field, but rather as a window into the complexities of being an ethnographer in the contemporary world. Against a backdrop of subject populations increasingly informed about global relations of power and more specifically informed about the topography of American imperialism, these humanistic essays vividly reflect recent shifts in both the focus and methods of anthropological research, as well as the dilemmas underlying the construction of anthropological knowledge. They are meant to spark discussion and debate. While tailored to an audience relatively new to ethnographic fieldwork and intended as a teaching tool, this collection should appeal to anthropologists and ethnographers at all points in their career.
