Distributed Multimedia Database Technologies Supported by MPEG-7 and MPEG-21 Harald Kosch, 2003-11-24 A multimedia system needs a mechanism to communicate with its environment the Internet clients and applications MPEG 7 provides a standard metadata format for global communication but lacks the framework to let the various players in a system interact MPEG 21 closes this gap by establishing an infrastructure for a distributed multimedia frame

Networking the World, 1794-2000 Armand Mattelart, 2000 In the age of satellites and the Internet worldwide communication has become increasingly unified amid overblown claims about the redemptive possibilities of international networks But this rhetoric is hardly new As Armand Mattelart demonstrates in *Networking the World 1794-2000* globalization and its attendant hype have existed since road and rail were the fastest way to move information Mattelart

plates contemporary global communication networks into historical context and shows that the networking of the world began much earlier than many assume in the late eighteenth century He argues that the internationalization of communication was spawned by such Enlightenment ideals as universalism and liberalism and examines how the development of global communications has been inextricably linked to the industrial revolution modern warfare and the emergence of nationalism Throughout Mattelart eloquently argues that discourses of better living through globalization often mask projects of political economic and cultural domination
