The Global City 2.0 Kristin Ljungkvist, 2015-08-27 Global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics So far surprisingly few studies have analyzed the role of the Global City beyond its already well explicated role in the globalized economy How is it that local governments of Global Cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments What does it mean to be and to govern the contemporary Global City In this book Kristin Ljungkvist claims that we can better understand why local governments find it to be in their Global City s interest to claim international political authority by exploring how the city s role in the globalized world is constructed and narrated locally A core claim is that Global City hood as a specific type of collective identity can play a constitutive part in such interest formation Combining insights from International Relations and Urban Studies scholarship and with the help of a case study on New York City Ljungkvist develops a new analytical framework for studying the Global City as an international political actor The Global City 2.0 shows that even as the Global City engages in various global issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic
