Alvord, 2019-09-05 This edited volume provides state of the art research on developing areas of Spanish in contact with other languages This manuscript is unique in its broad yet coherent approach to the study of Spanish in bilingual contexts by investigating current issues in the field through well designed research and innovative analyses In addition this book concludes with research on how languages in contact are reflected in individuals in educational settings as well as insights on how to teach bilinguals raised in contact with English and Spanish This manuscript is divided into three major themes that focus on the overall issues of Spanish in bilingual contexts 1 The first section titled Language and Identity is composed of four chapters that focus on the connection between language and identity in unique settings 2 The second section of the manuscript is titled Language and Dialectal Contact and is composed of six chapters that analyze the dialectal and linguistic changes in languages in contact in a variety of settings 3 The final section is titled Language in Educational Settings and consists of four chapters with a focus on heritage speakers and second language students of Spanish in different classroom settings as well as abroad This volume contributes original research in these areas in a way so as to fill valuable gaps in the current knowledge in the field especially in the innovative ways of approaching areas such as teaching heritage learners understanding diachronic and synchronic dialectal and linguistic changes as well as innovations in language use and how language contributes to the formation of identity
Multi-Dimensional Summarization in Cyber-Physical Society Hai Zhuge, 2016-11-14 Text summarization has been studied for over a half century but traditional methods process texts empirically and neglect the fundamental characteristics and principles of language use and understanding Automatic summarization is a desirable technique for processing big data This reference summarizes previous text summarization approaches in a multi dimensional category space introduces a multi dimensional methodology for research and development unveils the basic characteristics and principles of language use and understanding investigates some fundamental mechanisms of summarization studies dimensions on representations and proposes a multi dimensional evaluation mechanism Investigation extends to incorporating pictures into summary and to the summarization of videos graphs and pictures and converges to a general summarization method Further some basic behaviors of summarization are studied in the complex cyber physical social space Finally a creative summarization mechanism is proposed as an effort toward the creative summarization of things

which is an open process of interactions among physical objects data people and systems in cyber physical social space through a multi dimensional lens of semantic computing The author s insights can inspire research and development of many computing areas The first book that proposes the method for the summarization of things in cyber physical society through a multi dimensional lens of semantic computing A transformation from the traditional application driven research paradigm into a data driven research paradigm for creative summarization through information modeling cognitive modeling and knowledge modeling A multi dimensional methodology for studying managing creating and applying methods

Sociolinguistics and Language History Terttu Nevalainen, Helena Raumolin-Brunberg, 2023-11-27 What role has social status played in shaping the English language across the centuries Have women also been the agents of language standardization in the past Can apparent time patterns be used to predict the course of long term language change These questions and many others will be addressed in this volume which combines sociolinguistic methodology and social history to account for diachronic language change in Renaissance English The approach has been made possible by the new machine readable Corpus of Early English Correspondence CEEC specifically compiled for this purpose The 2.4 million word corpus covers the period from 1420 to 1680 and contains over 700 writers The volume introduces the premises of the study discussing both modern sociolinguistics and English society in the late medieval and early modern periods A detailed description is given of the Corpus of Early English Correspondence its encoding and the separate database which records the letter writers social backgrounds The pilot studies based on the CEEC suggest that social rank and gender should both be considered in diachronic language change but that apparent time patterns may not always be a reliable cue to what will happen in the long run The volume also argues that historical sociolinguistics offers fascinating perspectives on the study of such new areas as pragmatization and changing politeness cultures across time This extension of sociolinguistic methodology to the past is a breakthrough in the field of corpus linguistics It will be of major interest not only to historical linguists but to modern sociolinguists and social historians

Towards a Social Science of Language Gregory R. Guy, 1996 This is a two volume collection of original research papers designed to reflect the breadth and depth of the impact that William Labov has had on linguistic science Four areas of Labovian linguistics are addressed First is the study of variation and change the papers in sections I and II of the first volume take this as their central theme with a focus on either the social context and uses of language I or on the the internal linguistic dynamics of variation and change II The study of African American English and other language varieties in the Americas spoken by people of African descent and influenced by their linguistic heritage is the subject of the papers in section III of the first volume The third theme is the study of discourse the papers in section I of the second volume develop themes in Labovian linguistics that go back to Labov's work on narrative descriptive and therapeutic discourse Fourth is the emphasis on language use the search for discursive interactive and meaningful determinants of the complexity in human communication Papers with these themes appear in section II of the second volume *Introducing Language and Society* Rodney H. Jones, Christiana Themistocleous, 2022-02-03 This accessible and entertaining textbook introduces students to both traditional and more contemporary approaches to sociolinguistics in a real world context addressing current social problems that students are likely to care about such as racism inequality political conflict belonging and issues around gender and sexuality Each chapter includes exercises case studies and ideas for small scale research projects encouraging students to think critically about the different theories and approaches to language and society and to interrogate their own beliefs about language and communication The book gives students a grounding in the traditional concepts and techniques upon which sociolinguistics is built while also introducing new developments from the last decade such as translanguaging multimodality superdiversity linguistic landscapes and language and digital media Students will also have online access to more detailed examples links to video and audio files and more challenging exercises to strengthen their skills and confidence as sociolinguists Society and Language Use Jürgen Jaspers, Jan-Ola Östman, Jef Verschueren, 2010-09-10 The ten volumes of Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way While the other volumes select specific philosophical cognitive grammatical cultural variational interactional or discursive angles this seventh volume underlines the mutually constitutive relation between society and language use It highlights a number of the most prominent approaches of this relation and it draws attention to a selected number of topics that the study of language in its social context has

characteristically brought to bear. Despite their theoretical and methodological differences each of the chapters in this book assumes that it is necessary to look at society and language use as interdependent phenomena and that by attending to microscopic linguistic phenomena one is also keeping a finger on the pulse of broader macroscopic social tendencies that at the same time facilitate and constrain language use. The introduction provides a sketch of the intellectual antecedents of the volume's two mother disciplines viz linguistics and social theory before pointing at recent common ground in the rising attention for discourse and what has come to be called late modernity.

Network Publicity Governance Andréa Belliger, David J. Krieger, 2018-03-15. The information age has brought about a growing conflict between proponents of a data driven society on the one side and demands for protection of individual freedom autonomy and dignity by means of privacy on the other. The causes of this conflict are rooted in the modern Western opposition of individual and society and a self understanding of the human as an autonomous rational subject with an inalienable right to informational self determination. Andréa Belliger and David J Krieger propose a theory of information as a common good and redefine the individual as an informational self who exists in networks made up of both humans and nonhumans. Privacy is replaced by publicity and issues of data use and data

protection are described in terms of governance instead of government

Global Networks and Local Values National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee to Study Global Networks and Local Values, 2002-01-31 Whether you call it the third wave the information revolution or the virtually connected world the implications of a global information network are profound As a society we want to forestall the possible negative impacts without closing the door to the potential benefits But how Global Networks and Local Values provides perspective and direction focusing on the relationship between global information networks and local values that is the political economic and cultural norms that shape our daily lives This book is structured around an illuminating comparison between U S and German approaches toward global communication and information flow The United States and Germany are selected as two industrialized highly networked countries with significant social differences Global Networks and Local Values captures the larger context of technology and culture explores the political and commercial institutions where the global network functions and highlights specific issues such as taxation privacy free speech and more The committee contrasts the technical uniformity that makes global communication possible with the diversity of the communities being served and explores the prospects that problems resulting from technology can be resolved by still more technology This thoughtful volume will be of interest to everyone concerned about the social implications of the global Internet

Language Change Jean Aitchison, 2013 How and why do languages change Where does the evidence of language change come from How do languages begin and end This introduction to language change explores these and other questions considering changes through time The central theme of this book is whether language change is a symptom of progress or decay This book will show you why it is neither and that understanding the factors surrounding how language change occurs is essential to understanding why it happens This updated edition remains non technical and accessible to readers with no previous knowledge of linguistics

Dynamics of Complex Interconnected Systems: Networks and Bioprocesses Arne T. Skjeltorp, Alexander V. Belushkin, 2006-12-22 This volume comprises the proceedings of a NATO Advanced Study Institute ASI held at Geilo Norway 11-21 April 2005 the eighteenth ASI in a series held every two years since 1971 The objective of this ASI was to identify and discuss areas where synergism between modern physics and biology may be most fruitfully applied to the study of bioprocesses for molecular recognition and of networks for converting molecular reactions into usable signals and appropriate responses Many fields of research are confronted with networks Genetic and metabolic networks describe how proteins substrates and genes interact in a cell social networks quantify the interactions between people in the society the Internet is a complex web of computers ecological systems are best described as a web of species In many cases the interacting networks manifest so called emergent properties that are not possessed by any of the individual components This means that the detailed knowledge of the components is insufficient to describe the whole system Recent work has indicated that networks in nature have so called scale free characteristics and the associated dynamic

network modelling shows unexpected results such as an amazing robustness against accidental failures a property that is rooted in their inhomogeneous topology Understanding these phenomena and turning them to use in chemical and biological threat detection and response will require exploring a wide range of network structures as well

Languages and Social Cohesion Gabriela Meier, Simone Smala, 2021-08-30 A critical and systematic review of existing research located at the crossroads of sociology social psychology and applied linguistics *Languages and Social Cohesion* offers valuable insights for social contexts in which decision makers and researchers grapple with questions of social cohesion in the presence of linguistic diversity Based on a thematic analysis of 285 studies from 50 countries references available this book emphasises the crucial role languages play in understanding social cohesion and provides a framework of perspectives to aid exploration of these complex interlinkages Through interpreting the literature the authors established language repertoires as tools that facilitate social networks and access to resources Furthermore language norms and allegiances can subjectively shape the way groups use their language resources which can result in social inclusion exclusion and mediation between language groups Education particularly is highlighted as a policy tool that implements linguistic decisions and norms and steers status hierarchies and distribution of languages in society The theory informed and accessible tools featured can be used to guide and inform further research workshops or projects that investigate social cohesion and languages This book is relevant for diverse and intersecting spheres of influence such as groups communities institutions and authorities at local regional national and international levels

Language, Society, and New Media Marcel Danesi, 2015-07-24 *Language Society and New Media* uses an interdisciplinary approach integrating frameworks from sociolinguistics and linguistic anthropology and emerging strands of research on language and new media to demonstrate the relationship between language society thought and culture to students with little to no background in linguistics Couched in this integrative e sociolinguistic approach each chapter covers the significant topics in this area including language structures language and cognition and language variation and change to elucidate this relationship while also extending the purview of the field to encompass forms of new media including Facebook and Twitter Discussions are supported by a wealth of pedagogical features including sidebars activities and assignments and a comprehensive glossary In *Language Society and New Media* Marcel Danesi explores the dynamic connections between language society thought and culture and how they continue to evolve in today's rapidly changing digital world ideal for students in introductory courses in sociolinguistics language and culture and linguistic anthropology

Internet and Society in Latin America and the Caribbean International Development Research Centre (Canada), 2004 This book presents pioneering research that is designed to show from a qualitative and ethnographic perspective how new information and communication technologies as applied to the school system and to local governance initiatives merely reproduce traditional pedagogical approaches and the dominant forms by which power is exercised at the local level The studies thus constitute points of departure for further thinking about the need to promote an Internet culture
