Neue Briefe Wilhelm Humboldts Schiller

Friedrich Ueberweg

Neue Briefe Wilhelm Humboldts Schiller:

Wilhelm Von Humboldt and German Liberalism John Roberts, 2009 This is an important book not simply because it deals with one of the most remarkable individuals of German history of the late 18th early 19th centuries but because it explores some new foundations of liberalism in Germany This new study is based on a complete and thorough reading of von Humboldt's writings and biography The focus is to re-assess the origins and particular nature of von Humboldt's life and writings in the context of an understanding of contemporary liberalism and liberal theory The author asserts that German liberalism requires a re-evaluation and the works of Wilhelm von Humboldt are a significant clue to that reconsideration

Vitalizing Nature in the Enlightenment Peter H. Reill, 2005-06-06 This far-reaching study redraws the intellectual map of the Enlightenment and boldly reassesses the legacy of that highly influential period for us today Peter Hanns Reill argues that in the middle of the eighteenth century a major shift occurred in the way Enlightenment thinkers conceived of nature that caused many of them to reject the prevailing doctrine of mechanism and turn to a vitalistic model to account for phenomena in natural history the life sciences and chemistry As he traces the ramifications of this new way of thinking through time and across disciplines Reill provocatively complicates our understanding of the way key Enlightenment thinkers viewed nature His sophisticated analysis ultimately questions postmodern narratives that have assumed a monolithic Enlightenment characterized by the dominance of instrumental reason that has led to many of the disasters of modern life

The Genesis of the Symbolic Arno Schubbach, 2021-11-22 Ernst Cassirer's philosophy of culture has been much discussed in recent years However it remains unclear how it evolved from his older theory of knowledge This study deals with this question on the basis of Cassirer's disposition of a philosophy of the symbolic reconstructed here for the first time This text shows that the symbolic refers to culture as a whole and to its inherent diversity Therefore the symbolic includes the relationship between the general transcendental conditions of culture and its empirical specificities in language and languages art and the arts myth and myths science and disciplines Cassirer does not comprehend this empirical and specific reality of symbolization depending on pre-existing transcendental conditions Instead he proceeds from the empirical diversity of the symbolisations and reflects on their simultaneously general and specific conditions Thus Cassirer embarks on a path that he finds paved in Kant's Critique of Judgement He consequently defines the symbolic as the horizon for a reflective

approach based on empirical findings and not as the foundation of a systematic derivation of the diversity of culture in the style of the idealistic tradition *Briefwechsel deutschsprachiger Philosophen 1750-1850* Norbert Henrichs, Horst Weeland, 2011-05-02 Keine ausführliche Beschreibung für Briefwechsel deutschsprachiger Philosophen 1750-1850 verfügbar
