Neufert Architects Data:

Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects Data is an essential reference for the initial design and planning of a building project. It provides in one concise volume the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations and with over 6200 diagrams, it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition and represents a major new edition for an international English speaking readership. Reviews of the Previous Edition: Neufert's Architects Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. Cesar Pelli. With this thorough rewrite, Neufert has produced yet again an invaluable reference book. The Architects Journal.

Architects' Data Ernst Neufert, 2019-08-05 An indispensable tool for the beginning stages of designing and planning a building project. This new edition of a classic bestselling text provides in one concise volume the essential information needed to form the framework for the more detailed design and development of any building project. Organized largely by building type, it covers planning criteria and considerations of function and siting and with over 6200 diagrams, it provides a mass of data on spatial requirements. Most of the featured illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. The book also includes an extensive bibliography and detailed set of metric/imperial conversion tables. Architects Data starts with the basics of designing for a new building project before moving on to covering everything an architect needs to know. It also looks at the design styles and specifications for creating different types of structures such as those made for residential, religious, cultural, sports, medical and other types of occupation. Covers user requirements, planning criteria, basic dimensions and considerations of function and siting. Includes numerous examples and over 6200 illustrations and tables. 5th English edition of the classic international reference for architects. Architects Data is an excellent resource for architects, building surveyors, space planners and design and build contractors everywhere.

An Architecture of Parts: Architects, Building Workers and Industrialisation in Britain 1940 - 1970 Christine Wall, 2013-07-04 This book is unique in describing the history of post war reconstruction from an entirely new perspective by focusing on the changing relationship between architects and

building workers It considers individual as well as collective interactions with technical change and in doing so brings together for the first time an extraordinary range of sources including technical archives oral history and visual material to describe the construction process both during and in the decades after the war It focuses on the social aspects of production and the changes in working life for architects and building workers with increasing industrialization in particular analysing the effect on the building process of introducing dimensionally co ordinated components Both architects and building workers have been accused of creating a built environment now popularly discredited architects responsible for poor design and building workers for poor workmanship However many of the structures and ideas underpinning this period of rapid change were revolutionary in their commitment to a complete transformation of the building process An Architecture of Parts adds to the growing literature on changes in the building world during and immediately after the Second World War It is significant both empirically and historically in its examination of the ideas technology and relationships that fired industrialization of the building process in mid century Britain

Architectures of Bureaucracy Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These

buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions As such this book contributes to our understanding of political culture in the age of extremes

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

Gender Studies in Architecture Dörte Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to

the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment

Use Matters Kenny Cupers, 2013-10-15 From participatory architecture to interaction design the question of how design accommodates use is driving inquiry in many creative fields Expanding utility to embrace people's everyday experience brings new promises for the social role of design But this is nothing new As the essays assembled in this collection show interest in the elusive realm of the user was an essential part of architecture and design throughout the twentieth century Use Matters is the first to assemble this alternative history from the bathroom to the city from ergonomics to cybernetics and from Algeria to East Germany It argues that the user is not a universal but a historically constructed category of twentieth century modernity that continues to inform architectural practice and thinking in often unacknowledged ways

Ebola and Marburg treatment centres World Health Organization, 2014-07-25 This manual addresses the design and construction of healthcare facilities supporting the response to Ebola and Marburg E M disease outbreaks particularly in treatment centres TCs It provides technical guidance minimum requirements practical tools and layout examples and references for planning designing building and operating healthcare facilities TCs and others to respond to E M disease outbreaks in low and middle income contexts and resource limited settings The manual complements other World Health Organization WHO literature and contributes to the standardization of facility design and operation for safe and humane care and treatment of patients

Governing by Design Aggregate Architectural History Collaborative, 2012-04-29 Governing by Design offers a unique perspective on twentieth century architectural history It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics culture economics and globalization to uncover the roots of how our built environment evolves In these chapters historians offer their analysis on design as a vehicle for power and as a mediator of social currents Power is defined through a variety of forms modernization obsolescence technology capital ergonomics biopolitics and others The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct action identity and design They follow design as it functions through the body in the home and at the state and international level Overall Aggregate views the intersection of architecture with the human need for what Foucault termed governmentality societal rules

structures repetition and protocols as a way to provide security and tame risk Here the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era *Media Architecture* Alexander Wiethoff, Heinrich Hussmann, 2017-02-20 The augmentation of urban spaces with technology commonly referred to as Media Architecture has found increasing interest in the scientific community within the last few years At the same time architects began to use digital media as a new material apart from concrete glass or wood to create buildings and urban structures Simultaneously Human Computer Interaction HCI researchers began to exploit the interaction opportunities between users and buildings and to bridge the gaps between interface information medium and architecture As an example they extended architectural structures with interactive light emitting elements on their outer shell thereby transforming the surfaces of these structures into giant public screens At the same time the wide distribution of mobile devices and the coverage of mobile internet allow manifold interaction opportunities between open data and citizens thereby enabling the internet of things in the public domain However the appropriate distribution of information to all citizens is still cumbersome and a mutual dialogue not always successful i e who gets what data and when In this book we therefore provide a deeper investigation of Using Information and Media as Construction Material with media architecture as an input and output medium *Architecture, Urban Space and War* Mirjana Ristic, 2018-07-18 This book investigates architectural and urban dimensions of the ethnic nationalist conflict in Sarajevo the capital of Bosnia and Herzegovina during and after the siege of 1992 1995 Focusing on the wartime destruction of a portion of the cityscape in central Sarajevo and its post war reconstruction re inscription and memorialization the book reveals how such spatial transformations become complicit in the struggle for reconfiguration of the city s territory boundaries and place identity Drawing on original research the study highlights the capacities of architecture and urban space to mediate terror violence and resistance and to deal with heritage of the war and act a catalyst for ethnic segregation or reconciliation Based on a multi disciplinary methodological approach grounded in architectural and urban theory the spatial turn in critical social theory and assemblage thinking as well as techniques of spatial analysis in particular morphological mapping the book provides an innovative spatial framework for analyzing the political role of contemporary cities
