Graphic Horizons Luis Hermida González, João Pedro Xavier, Inés Pernas Alonso, Carlos Losada Pérez, 2024-04-05 This book reports on several advances in architectural graphics with a special emphasis on education research and heritage It gathers a selection of contributions to the 20th International Congress of Architectural Graphic Expression EGA 2024 held on May 27 29 2024 in Porto Portugal with the motto Graphic Horizons This is the third volume of a 3 volume set **The Oxford Handbook of Media, Technology, and Organization Studies** Timon Beyes, Robin Holt, Claus Pias, 2020 This Handbook explores the largely uncharted territory of media technology and organization studies and interrogates their foundational relations their forms and their consequences The chapters consider how specific mediating technological objects such as the Clock or the Smartphone help us to create organizational form Architecture against Democracy Reinhold Martin, Claire Zimmerman, 2024-04-30 Examining architecture's foundational role in the repression of democracy Reinhold Martin and Claire Zimmerman bring together essays from an array of scholars exploring the troubled relationship between architecture and antidemocratic politics Comprising detailed case studies throughout the world spanning from the early nineteenth century to the present *Architecture against Democracy* analyzes crucial occasions when the built environment has been harnessed as an instrument of authoritarian power Alongside chapters focusing on paradigmatic episodes from twentieth century German and Italian fascism the contributors examine historic and contemporary events and subjects that are organized thematically including the founding of the Smithsonian Institution Ellis Island infrastructure the aftermath of the Paris Commune Cold War West Germany and Iraq Frank Lloyd Wright's domestic architecture and Istanbul's Taksim Square Through the range and depth of these accounts *Architecture against Democracy* presents a selective overview of antidemocratic processes as they unfold in the built environment throughout Western modernity offering an architectural history of the recent nationalist international As new forms of nationalism and authoritarian rule proliferate across the globe this timely collection offers fresh understandings of the role of architecture in the opposition to democracy Contributors Esra Akcan Cornell U Can Bilsel U of San Diego Jos H Bortoluci Getulio Vargas Foundation Charles L Davis II U of Texas at Austin Laura diZerega Eve Duffy Duke U Mar a Gonz lez Pend s Cornell U Paul B Jaskot Duke U Ana Mar a Le n Harvard U Ruth W Lo Hamilton College Peter Minosh Northeastern U Itohan Osayimwese Brown U Kishwar Rizvi Yale U Naomi Vaughan Nader Vossoughian New York Institute of Technology and Columbia U Mabel O Wilson Columbia U **The Portfolio and the Diagram** Hyungmin Pai, Hyŏng-min Pae, 2002 A history of modern architecture as a discursive practice **The Architect's Sourcebook** Stanislas Chaillou, 2024-06-17 The Architect's Sourcebook provides readers with an accessible and playful space planning manual for the digital age The Sourcebook conveniently brings together general dimensions layout tips and the CAD data designers actually need to draw spaces in their software A 1000 readily downloadable CAD blocks provided by the software company Rayon are offered throughout the Sourcebook to help architects address generic typologies housing

office and outdoor spaces The quality and diversity of this digital repository will become the architect's best friend to create most kinds of space layout At a time when Architecture's tool set and knowledge leaves increasingly online this book represents both a much needed update to traditional architectural handbooks and a timely complement to well known design manuals More than 1 000 CAD blocks to download for 2 D floor layout planning Design for housing office and outdoor spaces leisure and sports Introductory texts on the typologies and the use of the book Cultural Influences on Architecture Koç, Gülşah, Claes, Marie-Therese, Christiansen, Bryan, 2016-10-19 A society's culture is a contributing factor to the structure and design of its architecture As contemporary globalism brings about the evolution of the world architectural style evolves along with it which can be observed on an international scale Cultural Influences on Architecture is a pivotal reference source for the latest research on the impact of culture on architecture through the aspects of planning and production and highlights the importance of communicative dimension in design Featuring exhaustive coverage on a variety of relevant perspectives and topics such as the evolution of construction systems benefits of nature based architecture and fundamentals of social capital this publication is ideally designed for researchers scholars and students seeking current research on the connection between culture and architecture on a global level **Governing by Design** Aggregate Architectural History

Collaborative, 2012-04-29 Governing by Design offers a unique perspective on twentieth century architectural history It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics culture economics and globalization to uncover the roots of how our built environment evolves In these chapters historians offer their analysis on design as a vehicle for power and as a mediator of social currents Power is defined through a variety of forms modernization obsolescence technology capital ergonomics biopolitics and others The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct action identity and design They follow design as it functions through the body in the home and at the state and international level Overall Aggregate views the intersection of architecture with the human need for what Foucault termed governmentality societal rules structures repetition and protocols as a way to provide security and tame risk Here the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era Digital Signifiers in an Architecture of Information

Pablo Lorenzo-Eiroa, 2023-05-31 This book proposes a new critical relationship between computation and architecture developing a history and theory of representation in architecture to understand and unleash potential means to open up creativity in the field Historically architecture has led to spatial representation Today computation has established new representational paradigms that can be compared to spatial representations such as the revolution of perspective in the Renaissance Architects now use software robotics and fabrication tools with very little understanding and participation in how these tools influence revolutionize and determine both architecture and its construction today Why does the discipline of

architecture not have a higher degree of authorship in the conception and development of computational technologies that define spatial representation This book critically explores the relationship between history theory and cultural criticism Lorenzo Eiroa positions new understandings through parallel historical sections and theories of many revolutionary representational architecture canons displaced by conventional spatial projection He identifies the architects artists mathematicians and philosophers that were able to revolutionize their disciplines through the development of new technologies new systems of representation and new lenses to understand reality This book frames the discussion by addressing new means to understand and expand architecture authorship in relation to the survey information representation higher dimensional space Big Data and Artificial Intelligence in the pursuit of activating an architecture of information This will be important reading for upper level students and researchers of architecture and architectural theory especially those with a keen interest in computational design and robotic fabrication Design-Tech: Building Science for Architects Jason Alread, Thomas Leslie, Rob Whitehead, 2025-03-19 The third edition of Design Tech provides an indispensable holistic resource for integrating building technologies into critically designed performance based architectural projects The book's format follows the developmental stages of a typical architectural project it provides a step by step process for addressing and integrating building sciences from first principles of human comfort materials structures and environmental systems to advanced construction systems and measures of building performance Short chapters incorporate easy to understand information with hundreds of useful illustrations tables and references that explain the why as well as the how of building science The content focuses on what designers need to know in the studio to create sustainably designed integrated buildings and it prepares them for future discussions with engineers contractors and consultants The updated format builds a coherent framework for integrated project design studio development necessary for all contemporary accredited schools of architecture Chapters build upon critical project information from schematics toward technical integration New chapters emphasize performance based design strategies including sustainable design values critical schematic planning enhanced building envelope design strategies and advanced performance systems Enhanced visualization of schematic design strategies helps explain sustainable design standards code compliance and structural schematics and throughout the third edition focuses on contemporary issues such as embodied carbon heavy timber construction life cycle costs and long term performance This will be a must read for all architecture students looking for an accessible guide to building science

Facades they are the first feature of a building to be noticed they determine its distinctive appearance and are often the subject of controversial debate This new first edition of the Facade Construction Manual provides a systematic survey of contemporary expertise in the application of new materials and energy efficient technologies in facade design and represents an invaluable addition to our series of Construction Manuals It surveys the facade design requirements made by various

types of buildings as well as the most important materials from natural stone through to synthetics and documents a diversity of construction forms for a wide range of building types Over 100 international case studies in large scale detailed drawings are presented in the comprehensive project section *Constructing Architecture* Andrea Deplazes, 2005-07-25 Now in its

second edition the trailblazing introduction and textbook on construction includes a new section on translucent materials and an article on the use of glass **The Organic Line** Irene V. Small, 2024-10-08 A major rethinking of twentieth century

abstract art mobilized by the work of Brazilian artist Lygia Clark What would it mean to treat an interval of space as a line thus drawing an empty void into a constellation of art and meaning laden things In this book Irene Small elucidates the signal

discovery of the Brazilian artist Lygia Clark in 1954 a fissure of space between material elements that Clark called the organic line For much of the history of art Clark's discovery much like the organic line has escaped legibility Once recognized however the line has seismic repercussions for rethinking foundational concepts such as mark limit surface and

edge A spatial cavity that binds discrepant entities together the organic line transforms planes into flexible topologies borders into membranes and interstices into points of connection As a paradigm the organic line has profound

historiographic implications as well inviting us to set aside traditional notions of influence and origin in favor of what Small terms weak links and plagiotropic relations These fragile oblique and transversal ties have their own efficacy and Small's

innovative readings of canonical modernist works such as Kazimir Malevich's Black Square John Cage's 4'33" and Le Corbusier's machine habiter as well as contemporary works by such artists as Adam Pendleton Ricardo Basbaum and Mika

Rottenberg reveal the organic line's remarkable potential as an analytic instrument Mobilizing a rich repertoire of archival

sources and moving across multiple chronologies geographies and disciplines this book invites us to envision modernism not as a stable construct defined by centers and peripheries inclusions and exclusions but as a topological field of interactive destabilizing tensions More than a history of a little known artistic device *The Organic Line Toward a Topology of Modernism* is a user's guide and manifesto for reimagining modern and contemporary art for the present
