Neuroanatomy Of Social Behaviour An Evolutionary And Psychoanalytic Perspective:

Neuroanatomy of Social Behaviour Ralf-Peter Behrendt, 2018-04-17 This book is for readers who are knowledgeable about the neurosciences and curious about brain mechanisms that produce normal and pathological social behaviour It is a reference work that presents and reviews facts and recent findings that need to be accounted for within a coherent neuroanatomy and neurophysiology of social behaviour

The Evolved Structure of Human Social Behaviour and Personality Ralf-Peter Behrendt, 2018-04-17 This book concerned with psychoanalytic conceptualisations helps to lay the foundation for a biologically and evolutionarily sensible model of human social behaviour and personality and also helps to bridge the gap between psychoanalysis and neuroscience

Emotion , Emotion Ross Buck, 2014-10-09 Emotions suffuse our lives a symphony of feeling usually whispering and murmuring in pianissimo but occasionally screaming and shouting in fortissimo crescendo filling every waking moment and even invading our dreams We can always be conscious of how happy sad annoyed or anxious we feel and also of the feelings we have relative to other persons pride envy guilt jealousy trust respect or resentment Developments in brain imaging and in capturing nuances of nonverbal display now enable the objective study of emotion and how biologically based primary emotions relate to higher level social cognitive and moral emotions This book presents an integrated developmental interactionist theory of emotion viewing subjective feelings as voices of the genes an affective symphony composed of dissociable albeit interactive neurochemical modules These primordial voices do not control but rather cajole our behavior with built in flexibility enabling the mindful application of learning reason and language

Language, Space and Mind Paul Chilton, 2014-07-10 A new approach to linguistic meaning and grammatical constructions based on simple geometric principles

The Interface Between Psychoanalysis and Neuroscience: The State of the Art Massimo Di Giannantonio, Georg Northoff, Anatolia Salone, 2020-12-11 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org/about/contact

The Evolved Structure of Human Social Behaviour and Personality Ralf-Peter Behrendt, 2012 The book reviews psychoanalytic theory with the aim of developing a evolutionarily feasible model of social behaviour and personality that can help to bridge the gap between psychoanalysis and neuroscience In bringing together various psychoanalytic theories with aspects of ethology sociology and behaviourism the book seeks to overcome the theoretical impasse faced by cognitive psychology and cognitive neuroscience in their endeavours to understand how the brain has evolved to organize complex social behaviour in humans The book is of academic interest addressing those working in behavioural sciences who want to gather what can be

learned from the rich body of psychoanalytic theory for the sake of advancing the goal shared by all behavioural sciences to elucidate the principles of regulation of social behaviour and personality and understand where and how we can find their neural underpinnings It advocates that brain social behaviour relationship can only be understood if we learn from and integrate psychoanalytic insights gained across the last century from clinical work by what are often considered to be rival schools of thought

□□□□ □□□□□ □□□□ □□ (Bae, Min),2013-03-20 In this book Min Bae tries to suggest a new perspective of human nature and explain human behaviour through a physiological and psychological analysis To this end he examines individuals behaviours and mind sets as revealed in human nature and scrutinizes various processes of social interaction In the analysis he uses two conceptual tools the notions of individualism and collectivism as types of predispositional strategies and the biological market from the perspective of sociobiology Lastly he speculates about individualism and collectivism in a historical sense mainly dealing with their political aspects

The Archaeology of Mind: Neuroevolutionary Origins of Human Emotions (Norton Series on Interpersonal Neurobiology) Jaak Panksepp, Lucy Biven, 2012-09-17 What makes us happy What makes us sad How do we come to feel a sense of enthusiasm What fills us with lust anger fear or tenderness Traditional behavioral and cognitive neuroscience have yet to provide satisfactory answers The Archaeology of Mind presents an affective neuroscience approach which takes into consideration basic mental processes brain functions and emotional behaviors that all mammals share to locate the neural mechanisms of emotional expression It reveals for the first time the deep neural sources of our values and basic emotional feelings This book elaborates on the seven emotional systems that explain how we live and behave These systems originate in deep areas of the brain that are remarkably similar across all mammalian species When they are disrupted we find the origins of emotional disorders SEEKING how the brain generates a euphoric and expectant response FEAR how the brain responds to the threat of physical danger and death RAGE sources of irritation and fury in the brain LUST how sexual desire and attachments are elaborated in the brain CARE sources of maternal nurturance GRIEF sources of non sexual attachments PLAY how the brain generates joyous rough and tumble interactions SELF a hypothesis explaining how affects might be elaborated in the brain The book offers an evidence based evolutionary taxonomy of emotions and affects and as such a brand new clinical paradigm for treating psychiatric disorders in clinical practice

Relating in Psychotherapy John Birtchnell, 1999-02-28 In his earlier book How Humans Relate John Birtchnell proposed that relating occurs along two axes a horizontal one concerning becoming close versus being distant and a vertical one concerning being upper versus being lower He called closeness distance upperness and lowerness the relating objectives and he proposed that people need to acquire competence in attaining and maintaining these objectives In this book he argues that the task of psychotherapists is to identify and correct within these axes people's relating incompetencies and to enable people to cope with the relating incompetencies of others He considers this to be the case across all psychotherapies Dr Birtchnell proposes the existence of an unconscious automatic inner brain that monitors the relating objectives He argues that the psychotherapist assists the person through the conscious outer brain to correct and improve the inner brain's least effective relating strategies He uses the term interrelating to describe the interplay between the relating of two or more people This has application in couple family group and community therapy in which the psychotherapist's task is to enable the interrelaters to understand and correct their mutually reinforcing destructive interactions He introduces a set of questionnaires from the scores of which a computer can print out an easy to read diagram of the direction and degree of people's relating incompetencies

Social Neuroscience Russell K. Schutt, Larry J. Seidman, Matcheri S. Keshavan, 2015-06-09 Human beings evolved in the company of others and flourish in proportion to their positive social ties

To understand the human brain we must situate its biology in the wider context of society To understand society we must also consider how the brains and minds of individuals shape interactions with other human beings Social Neuroscience offers a comprehensive new framework for studying the brain human development and human behavior In this book leading researchers in the fields of neurobiology psychiatry psychology and sociology elucidate the connections between brain biology and the brain s functioning in the social world providing a state of the art interdisciplinary explanation of how humans think and act as well as the ways we define and treat pathological behavior Synthesizing the insights and perspectives of these experts Social Neuroscience examines how neural processes make the brain sensitive to social experience how cognition shapes social behavior and how social networks create a range of responses among different individuals to the same environmental stimuli The mutually reinforcing connections between brain mind and society have profound implications for human health from the emotionally damaging effects of severe social deprivation to the neurological impact of parental abuse and neighborhood violence The authors explore these connections with special focus on mental illnesses including schizophrenia a disorder characterized by marked social deficits in which a neurological basis is now well established
