Adult Neurogenic Language Disorders Joan C. Payne, 2014-02-25      Neurogenic Communication Disorders: Life Stories and the Narrative Self Plural Publishing, Incorporated, 2008-07

There is currently considerable focus on psychosocial issues for persons with aphasia and their significant others However there has been little unifying work that brings diverse interdisciplinary perspectives together to understand the impact of aphasia and other neurogenic communication disorders on the social construction and mediation of self or identity In this book the authors explore this idea

of social construction of self as it relates to the human need to create share and modify life stories particularly when confronting major life changes Their premise is that impaired communication can have a profound impact on one s perception of self and one s ability to negotiate the social reconstruction of self in the context of a neurological disorder The nature and extent of impact varies as seen in the book s in depth examination of narrative self for persons living with aphasia ALS Parkinson s disease and dementia as well as those aging without impairment The authors present theoretical grounding for using the concepts of self and the idea of a social and cultural tool kit that enables clients to interact with others and to define themselves in the context of those around them The text moves from theory to qualitative analyses of living with neurogenic disorders to implications for clinical interventions for individual clients and their significant others Language Case Files in Neurological Disorders Louise Cummings,2021-08-30 This book features case studies of ten individuals with acquired neurological disorders These disorders have implications for speech language and communication but to date they have not been the focus of research in speech language pathology Chapters present a brief medical overview of each condition followed by detailed linguistic analysis A carefully assembled narrative captures the impact of each neurological disorder on an individual s daily life and social activities This structured approach supported by further reading and exercises gives readers a nuanced understanding of each disorder s clinical presentation and language and communication features and the complex interrelationship between language communication and cognitive and motor symptoms The book will be of interest to students of all levels researchers and clinicians in speech language pathology and related disciplines including neurology psychiatry and psychology **Aphasia and Related Neurogenic Language Disorders** Leonard L.
