1 ENGINE CONTROL SYSTEM OVERVIEW

Figure 1-1

The fuel pump draws fuel from the fuel tank. Fuel flows through the pressure regulator. The supply pump increases the fuel pressure to approximately 150 psi (10.3 bar). Fuel is pumped through the fuel filter and the supply manifold for distribution through the fuel lines to the fuel injectors.

The pressure is controlled by the pressure regulator. The pressure regulator is located at the rear of the fuel manifold.

When fuel is injected, after the pressure regulator, excess fuel is returned to the tank.

In the injectors, the fuel pressure is increased to injection pressure of approximately 21,000 psi (1,448 bar).
