Prediction or Prophecy? Gregor Betz, 2007-10-06 Knowing in order to predict It was this leitmotiv alone that Auguste Comte in the 19th century considered suitable for the then rapidly developing empirical sciences This view remains unchanged until today not only in the empirical sciences themselves but also in the philosophy of science A scientific theory is and should be evaluated primarily on the grounds of its capacity to correctly predict observable phenomena The aim of predicting takes precedence over the other important aim of science namely to produce and purposefully manipulate phenomena by technical means in the laboratory moreover it even includes the latter For if scientists successfully produce and manipulate certain phenomena in an experiment they can ipso facto predict how that experiment will evolve under certain conditions We live in a scientifically dominated world The more science progresses the more important correct scientific predictions become To a sometimes even fatal extent we have made ourselves dependent on science and its results Our scientific technological interventions into nature yet also into social processes cover ever larger spatial and temporal distances and the consequences are ever more drastic given the increasing effort that would be required to reverse the effects if that is possible at all That is the reason why we ought to be very well informed about the consequences of our actions in particular those based on science and technology

Novel Pedagogy Liwen Zhang,2024-10-01 Is the novel a category of knowledge that merits serious study Even if the novel has shed the stigma of being mindless entertainment one might easily assume that reading a novel is not studying unless one reads closely and carefully preferably from a scholarly edition or for a scholarly purpose *Novel Pedagogy* explores how Victorian writers envisioned the novel s potential to become knowledge long before the form s ascendance into the ivory tower Liwen Zhang argues that Victorian novelists constant critique of schooling on the one hand and their frequent invocation of deep knowledge on the other are not self contradictory Instead of offering a blissful escape from education writers such as William Thackeray Charles Kingsley Charles Dickens Elizabeth Gaskell George Eliot and George Gissing seek to offer uniquely novelistic pathways to knowledge *Novel Pedagogy* offers a new model of novelistic epistemology by showing how the novel unlike other educational genres reflects on the unpleasant realities of learning and of not learning amid the ubiquity of ineffective textbooks reluctant students and false motivations
