Pathway to Sustainability John Fedkiw, Douglas W. MacCleery, V. Alaric Sample, 2004 The progress of forest management in the United States A broad and bounded path that leads us to the goal of sustainability Or a tree that branches as it grows Or chaos Four noted scholars offer their views on the evolution of forestry Hal Salwasser dean and director of the forest research laboratory at Oregon State University s College of Forestry poses provocative questions about the nature of forestry as the discipline seeks to meet society s needs while conserving the resource John Fedkiw senior policy adviser and analyst for USDA Secretary s Office for 28 years believes the same pathway that has led forestry through the thickets of multiple use and ecosystem management can now take us to our new goal sustainability Douglas W MacCleery senior policy analyst in forest and rangeland management for the National Forest System finds reason for optimism in the record of the past where he sees evidence that forestry can meet its latest challenge V Alaric Sample president of the Pinchot Institute for Conservation cautions that conserving biodiversity will require new approaches and adjustment of our course along the pathway These papers enlighten and illuminate sustainability both as a dynamic goal and a dynamic process and outline the challenges it presents to society it s policy makers and forest managers They help us to understand sustainability in its political dimensions and to approach sustainability systematically as a dynamic integrative societal process on the land

From the Forest to the Sea - Public Lands Management and Marine Spatial Planning Morgan Gopnik, 2015-01-09 The management of common pool resources and publicly owned areas is fraught with difficulty This book explores the long complex and frequently contentious history of public lands management in the United States in order to draw lessons for the emerging field of marine spatial planning MSP The author first establishes that these two seemingly different settings are in fact remarkably similar drawing on established theories of policy analysis The work then examines the management of US National Forests over the past 120 years including three place based case studies to discover recurring themes The analysis shows how different management approaches evolved over time in response to changing laws and cultural norms producing outcomes favored by different constituencies This history also reveals the ambiguities and contradictions inherent in multiple use management of any public space Next the book analyzes recent efforts to advance MSP both in the US and globally showing how they mirror past experiences in National Forest management including similar disagreements among stakeholders In conclusion the author suggests how those within ocean related sectors government academia industry and environmental groups might achieve their individual and collective goals more effectively based on lessons from the public lands setting

Patterns and Processes in Forest Landscapes Raffaele LaFortezza, Jiquan Chen, Giovanni Sanesi, Thomas R. Crow, 2008-08-30 Increasing evidence suggests that the composition and spatial configuration the pattern of forest landscapes affect many ecological processes including the movement and persistence of particular species the susceptibility and spread of disturbances such as fires or pest outbreaks and the redistribution of matter and nutrients Understanding these issues is key to the successful management of complex

multifunctional forest landscapes and landscape ecology based on a foundation of island biogeography and meta population dynamic theories provides the rationale to deal with this pattern to process interaction at different spatial and temporal scales This carefully edited volume represents a stimulating addition to the international literature on landscape ecology and resource management It provides key insights into some of the applicable landscape ecological theories that underlie forest management with a specific focus on how forest management can benefit from landscape ecology and how landscape ecology can be advanced by tackling challenging problems in forest landscape management It also presents a series of case studies from Europe Asia North America Africa and Australia exploring the issues of disturbance diversity management and scale and with a specific focus on how human intervention affects forest landscapes and in turn how landscapes influence humans and their culture An important reference for advanced students and researchers in landscape ecology conservation biology forest ecology natural resource management and ecology across multiple scales the book will also appeal to researchers and practitioners in reserve design ecological restoration forest management landscape planning and landscape architecture

Forest History Today ,2000 *Nature Wars* Jim Sterba, 2013-11-12 For four hundred years explorers traders and settlers plundered North American wildlife in an escalating rampage but in the twentieth century an incredible turnaround took place Conservationists created wildlife sanctuaries restored habitats and imposed regulations on hunters and trappers Over decades they nursed many wild populations back to health Then after World War II something happened that conservationists hadn t foreseen sprawl People moved into suburbs and then kept moving outward All the

while well meaning efforts to protect animals allowed wild populations to burgeon out of control causing damage costing billions degrading ecosystems and touching off disputes that polarized communities The result is a mix of people and wildlife that should be an animal lover s dream but often turns into a sprawl dweller s nightmare Deeply researched eloquently written and perceptively humorous *Nature Wars* expresses the need for organic reconnection with our natural ecosystem by offering a provocative look at how Americans created an inadvertent mess

Ground Work Char Miller,2007 *Ground Work* offers intriguing insights into American conservation history Miller demonstrates his remarkable ability as a historian to cast new light on familiar events and figures such as Bernhard Fernow and Gifford Pinchot and create a deeper and richer understanding of their significance both in their times and in our own *Ground Work* is a series of vignettes rather than a chronologically continuous tale It spans topics from the Progressive Era roots of the American conservation movement on which Miller has proven his virtuosity in earlier works such as *Gifford Pinchot and the Making of Modern Environmentalism* to new insights into the impact of documentary films on the environmental perceptions of 21st century urban America

Advanced undergraduate and graduate courses in environmental and forest history will find these essays stimulating general nonfiction readers very enlightening
