

# WORD PROCESSING ACTIVITY 3

What you will learn or practice:

- Setting Margins
- Changing font size
- Changing alignment
- Using bold print
- Typing a paragraph with word wrap
- Spell checking
- Copy and paste

Margins are tough to figure out!

## DIRECTIONS:

1. Open a Word document. Click on FILE- PAGE SET-UP. Change the margins to the following: top and bottom = 2 inches, left and right = 2 inches. Click on OK.
2. Change the font to Lucida Console, size 14 point, and type your name.
3. Change your name to bold print.
4. Center your name horizontally between the margins. (CENTER ALIGN)
5. Press the ENTER key once. Take OFF bold print.
6. Type Activity 3. Press the ENTER key twice.
7. Change the font to Times New Roman, size 12 point.
8. Change to LEFT ALIGN.
9. Type the paragraph below, with errors included, using word wrap (Do not hit enter at end of line). The computer may automatically correct some of your errors. That's ok. Hit ENTER when you are all done with the paragraph.

Did you spel this correctly? The spell checker may notice double words. Proper names such as as George, Tom, and Leessa may cause the spell checkr to display a message. You may be able to use a suggest buton so that you do not have to type each corection.

10. Use the spell checker to check for errors. Every red underlined word shows a potential error. Place the cursor on the word and right click. The computer will give you suggestions for changes. Click on the correct change. Another way to spell check is to click on the ABC icon on the

Maurer, Mohamed L Seghier, 2015-01-22 Reading is an integral part of life in today's information driven societies Since the pioneering work of Dejerine on word blindness in brain lesioned patients the literature has increased exponentially from neuropsychological case reports to mechanistic accounts of word processing at the behavioural neurofunctional and computational levels tapping into diverse aspects of visual word processing These studies have revealed some exciting findings about visual word processing including how the brain learns to read how changes in literacy impact upon word processing strategies and whether word processing mechanisms vary across different alphabetic logographic or artificial writing systems Other studies have attempted to characterise typical and atypical word processes in special populations in order to explain why dyslexic brains struggle with words how multilingualism changes the way our brains see words and what the exact developmental signatures are that would shape the acquisition of reading skills Exciting new insights have also emerged from recent studies that have investigated word stimuli at the system network level by looking for instance at how the reading system interacts with other cognitive systems in a context dependent fashion how visual language stimuli are integrated into the speech processing streams how both left and right hemispheres cooperate and interact during word processing and what the exact contributions of subcortical and cerebellar regions to reading are The contributions to this Research Topic highlight the latest findings regarding the different issues mentioned above particularly how these findings can explain or model the different processes mechanisms pathways or cognitive strategies by which the human brain sees

words The introductory editorial summarising the contributions included here highlights how varieties of behavioural tests and neuroimaging techniques can be used to investigate word processing mechanisms across different alphabetic and logographic writing systems
