Solving Problems in Technical Communication Johndan Johnson-Eilola, Stuart A. Selber, 2024-05-31 The field of technical communication is rapidly expanding in both the academic world and the private sector yet a problematic divide remains between theory and practice Here Stuart A Selber and Johndan Johnson Eilola both respected scholars and teachers of technical communication effectively bridge that gap Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real world problems faced by practitioners problems involving ethics intercultural communication new media and other areas that determine the boundaries of the discipline The book is structured in four parts offering an overview of the field situating it historically and culturally reviewing various theoretical approaches to technical communication and examining how the field can be advanced by drawing on diverse perspectives Timely informed and practical Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career Research in Technical Communication Michael G. Moran, Debra Journet, 1985 This sourcebook demonstrates the vigorous work being done in the field of technical and scientific communication Collectively the essays offer researchers a basis from which to begin constructing the theoretical framework necessary for the study of technical communication The book begins with general concerns and progresses to particular applications The chapters comprising Part I outline larger theoretical perspectives from which to examine technical communication humanistic approaches to technical communication the history of technical communication communication theory and technical writing and the teaching of technical writing Part II examines the relationship of technical communication to traditional rhetorical concerns such as invention audience modes of organization and style Specific types of technical communication proposals reports and business correspondence among others are discussed in Part III The use of the computer oral presentations and specialized forms of technical communication are examined in Part IV The appendixes offer guides to textbooks and style manuals and an overview of the technical writing profession Rhetorical Memory and Delivery John Frederick Reynolds, 2013-11-05 Why has classical rhetoric been a subject of such growing interest for the past ten years Because the most exciting work in classical rhetoric has asked us to rethink classical concepts in modern terms What's been missing at least in book length form is a scholarly rethinking of rhetorical memory and delivery As many scholars have been noting in their work for some time now three of five classical issues invention arrangement and style have dominated rhetorical studies while the other two memory and delivery have largely been misunderstood or ignored Reexamined in light of recent research on orality literacy and electronic technology rhetorical memory and delivery issues can become not only central to the field but also key to the continued interest in classical rhetoric Bringing together national scholars from a variety of related disciplines in which rhetorical memory and delivery issues matter this collection is the only volume that examines classical and contemporary interpretations of rhetorical memory and delivery in depth and detail

Civic Engagement and Technical Communication James M. Dubinsky, J. Harrison Carpenter, 2023-04-14 This special issue on civic engagement and technical communication focuses on the ways educators can help students become actively engaged members of society particularly a rhetorical democracy The first essay examines the concept of community as a locus for civic engagement and question some of the definitions of community seen embedded in current pedagogical practices The next article seeks to shape understanding of practice The tension of developing students civic awareness and engagement is the topic of the third paper The fourth article helps students gain skills and organization awareness and improves the perceived relevance of the work The final two essays approach the issue of civic engagement from slightly different angles one examining the role of teacher as both rhetor and instructor and the other looking to the past for possible solutions for the future By continuing the conversation about the relationship between technical communication and the public good and focusing specifically on pedagogical strategies and their theoretical and historical underpinnings the authors in this special issue clarify roles that technical communication and technical communicators play in civil society as well as

Handbook of Writing and Text Production Eva-Maria

Jakobs, Daniel Perrin, 2014-02-27 Writing matters and so does research into real life writing. The shift from an industrial to an information society has increased the importance of writing and text production in education in everyday life and in more and more professions in the fields of economics and politics, science and technology, culture and media. Through writing we build up organizations and social networks, develop projects, inform colleagues and customers, and generate the basis for decisions. The quality of writing is decisive for social resonance and professional success. This ubiquitous real life writing is what the present handbook is about. The de Gruyter Handbook of Writing and Text Production brings together and systematizes state of the art research. The volume contains five sections focussing on I the theory and methodology of writing and text production research as well as on problem oriented and problem solving approaches related to II authors, III modes and media, IV genres, and V domains of writing and text production. Throughout the 21 chapters exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions. Both established and future scholars can benefit from the handbook's fresh approach to writing in the context of multimodal, multi-semiotic text production.

Paralogic Rhetoric Thomas Kent, 1993

Building on the ideas of philosophers and literary theorists such as Donald Davidson, Richard Rorty, Jacques Derrida, Jean-François Lyotard, and Mikhail Bakhtin, Thomas Kent investigates in *Paralogic Rhetoric* the role that interpretation plays in the acts of writing and reading. Kent argues that both writing and reading as kinds of communicative interaction constitute thoroughly hermeneutic activities that cannot be reduced to discreet conceptual frameworks or to systemic processes of one kind or another. Kent calls his view of communicative interaction *paralogic hermeneutics*, and he employs this notion to critique some of our most influential contemporary approaches to the study of writing and reading. Kent develops his argument in two general stages. In the first stage, chapters one through four, he discusses the meaning of the term *paralogy* and defines the concept of *paralogic hermeneutics*. In addition, he attacks in these chapters the claim endorsed by many rhetoricians and literary theorists that language conventions control the meaning of utterances and, in place of the conventionalist formulation of communicative interaction, Kent advocates an externalist account of meaning that attempts to move beyond the old Cartesian opposition of mind and world. In stage two of his argument, chapters five through seven, Kent draws out some of the practical implications of a *paralogic hermeneutics* for the disciplines of rhetoric and literary criticism. One of Kent's most provocative and important

claims in these chapters concerns his assertion that the traditional disciplinary boundary existing between composition studies and literary studies evaporates once writing and reading are regarded as hermeneutic endeavors Finally Paralogic Rhetoric represents a frontal assault on some of the fundamental assumptions about writing and reading held by many of our most important contemporary rhetoricians and literary theorists Kent argues persuasively that the time has arrived for a reconsideration of our current conceptions concerning both the production and the reception of discourse and in these pages he proposes a description of communicative interaction that serves as a large first step toward a radical redescription of writing and reading BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Connecting People with Technology George Hayhoe, Helen M. M Grady, 2020-11-26 This book explores five important areas where technology affects society and suggests ways in which human communication can facilitate the use of that technology Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots which emphasize purpose and audience As our appreciation of audience has grown beyond engineers and scientists to lay users of technology our appreciation of the diversity of those audiences in terms of age geography and other factors has similarly expanded We are also coming to grips with what Thomas Friedman calls the flat world a paradigm that influences how we communicate with members of other cultures and speakers of other languages And because most of the flatteners are either technologies themselves or technology driven technical and professional communicators need to leverage these technologies to serve global audiences Similarly we are inundated with information about world crises involving health and safety issues These crises are driven by the effects of terrorism the aging population HIV AIDS and both human made and natural disasters These issues are becoming more visible because they are literally matters of life and death Furthermore they are of special concern to audiences that technical and professional communicators have little experience targeting the shapers of public policy seniors adolescents and those affected by disaster Biotechnology is another area that has provided new roles for technical and professional communicators We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments Confronting this complex network of issues we re challenged to fashion both our message and the audience s perceptions ethically Finally today s corporate environment is being shaped by technology and the global nature of business Technical and professional communicators can play a role in capturing and managing knowledge in using technology effectively in the virtual workplace and in understanding how language shapes organizational culture *A Reference Guide for English Studies* Michael J. Marcuse, 1990-01-01 This text is an introduction to the full range of standard reference tools in all branches of English studies More than 10 000 titles are included The Reference Guide covers all the areas traditionally defined as English studies and all the field of inquiry more recently associated with English studies British and Irish American and world literatures
