International Partnerships for Strengthening Health Care Workforce Capacity: Models of Collaborative Education Jeanne Mahoney Leffers,Jennifer Gail Audette, Kevin S. Hardwick,William Van Cleve,2018-07-31 A critical problem in resource scarce countries across the globe is the shortage of appropriately trained health care providers According to the World Health Organization the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035 This disproportionately affects resource scarce countries denying basic health care to millions and limiting access to life saving treatments Due to limited resources in these countries not enough health professionals receive training few have the opportunity for continuing education and the ability to develop or implement educational programs and curricula is constrained Additionally many existing providers choose to emigrate in pursuit of professional advancement opportunities contributing to the overall shortage of qualified health care providers in these environments Efforts to strengthen health workforce capacity not only increases access safety and availability of care but is critical to building resilient health systems capable of caring for the world's neediest populations This requires not only cultivating new health care providers but also providing ongoing professional development to retain and support current

providers advancing the level of practice in accordance with current clinical science cultivating educators and enhancing training curricula It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships Collectively the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic non governmental organizations and other global partnership forms The published manuscripts highlight various elements of partnerships with several consistent themes emerging capacity building local empowerment mutual trust and respect long term commitment equity collaboration and the importance of integrating theory and practice for a balance of academic and clinical development The manuscripts provide examples of partnership and educational programs that are in the formative early stages of implementation and others which have been sustained long term some for decades The following eBook is divided into two parts with each part broken down into sections Part I of the eBook includes 18 manuscripts that showcase long term educational programs that strongly exemplify multiple foundational aspects of international partnerships in education including mutual collaboration and project management empowerment of host partners to lead and sustain programs and capacity building While individual manuscripts included in Part I look broadly at multiple aspects of successful international partnerships in education Part II manuscripts focus intently on one two elements Part II includes 13 articles that highlight partnership through short rather than long term educational initiatives as well as program development and broad academic partnerships This Research Topic was sponsored by Health Volunteers Overseas a United States based non profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low resource countries to provide continuing education train the trainer courses professional support and consultation on academic program and curricula development

Little, 2005 What relevance does the Apostle Paul have for the mission of the church in the twenty first century By investigating his socioeconomic background examining his doxological orientation in mission delineating how and why he shared resources in the first century and then relating all this to what has been called the contemporary International Partnership Movement this book demonstrates that when the church engages in cross cultural mission and ignores Pauline orthopraxy it places unnecessary obstacles in the path of the missio Dei Therefore Mission in the Way of Paul Biblical Mission for the Church in the Twenty First Century is pertinent for any course devoted to learning from and implementing biblical models of mission today **Partnership for Democratic Governance Contracting Out Government Functions and Services Emerging Lessons from Post-Conflict and Fragile Situations** OECD, African Development Bank, 2009-12-03 The second volume of the Partnership for Democratic Governance Series investigates whether contracting out core government functions and services has been conducive to capacity development Case studies discusses the evidence and emerging lessons of contracting out *Medical care for the armed forces* Great Britain: Parliament: House of Commons: Defence Committee, 2008-02-18 The Committee investigated the provision of healthcare for the armed forces and examined six key areas The first was the treatment of personnel seriously wounded on operations and the procedures for caring for them from the point of wounding to evacuation to and treatment in the United Kingdom The second area was the rehabilitation work for those with serious musculo skeletal or neurological injuries The third was the relationship between the Ministry of Defence and the National Health Service in terms of delivering healthcare The fourth area examined was the care for veterans and service families The fifth issue was mental healthcare both for service personnel and for veterans Finally the report examines the role of reserve personnel in the Defence Medical Services Clinical care provided by the Defence Medical Services DMS in conjunction with the NHS for personnel injured on operations is world class Rehabilitation work is also found to be exceptional Services to the armed forces are delivered by the DMS NHS charities and welfare organisations and this helps link the community with service personnel The Committee would like a wider debate on which services are most appropriately provided by each sector The Ministry of Defence s decision to base its secondary care around units embedded in NHS Trust is supported but there is scope for more sharing of best practice between the DMS and the NHS With veterans the Committee is not sure adequate procedures are in place to identify veterans and to ensure priority access to services

Mental health is a vital responsibility for DMS but a robust tracking system for veterans is needed The reserve forces contribution to the delivery of military healthcare is praised but there is a danger of being overstretched *Hospitality, Travel, and Tourism: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2014-10-31 Over generations human society has woven a rich tapestry of culture art architecture and history personified in artifacts monuments and landmarks arrayed across the globe Individual communities are looking to exploit these local treasures for the benefit of the travelers who come to see them Hospitality Travel and Tourism Concepts Methodologies Tools and Applications considers the effect of cultural heritage and destinations of interest on the global economy from the viewpoints of both visitor and host This broadly focused multi volume reference will provide unique insights for travelers business leaders sightseers cultural preservationists and others interested in the unique variety of human ingenuity and innovation around the world **Navy Medicine** ,2007 OECD Regional Development Studies Working Together for Local Integration of Migrants and Refugees in Rome OECD,2019-04-02 This report focuses on the local level integration of migrants in Rome and provides information on the national framework for integration in Italy **The Patient Room** Wolfgang Sunder,Julia Moellmann,Oliver Zeise,Lukas Adrian Jurk,2020-12-07 The patient room is the smallest cell of the hospital organism Its layout determines the structure of the ward and is therefore a decisive factor for the entire building Many requirements have to be met The patient s sense of well being can be positively influenced by the design homely materials an attractive view and sufficient privacy are important objectives Equally important are the working conditions for the staff especially short distances and an efficient care routine Finally even the risk of infection can be reduced by a conscientiously planned room layout This publication provides a systematic overview of the design task patient room and shows exemplary solutions both typologically and in selected case studies **Universal Health Coverage Partnership annual report 2019.
